

## Vintage Kit

No.	Kit Name (Category)	Kit Name (LCD) (Variation)	File Name	Order in File USR No.	Kit Description
1	Vintage Kit	Vintage	VINTAGE.T3A	1	This has been programmed to sound like an original Yamaha 9000 kit with black lacquered shell interiors and rounded bearing edges. The original samples are of Birch Custom Absolute drums, but with careful EQ and tuning they now have the sound of a 24" bass drum, 13", 14" rack toms and 16" and 18" floor toms. This is a very mellow, low sounding kit, with large, thin cymbals. The Misc fader also adjusts the volume of a hi hat mounted tambourine, which is most noticeable when pedalling the hi hat, as well as the Sub Kick.
2	Vintage Kit	VintageTight	VINTAGE.T3A	2	Tuned up for a tighter sound.
3	Vintage Kit	Vintage Lo	VINTAGE.T3A	3	Really low and loose.
4	Vintage Kit	VintageTune4	VINTAGE.T3A	4	Tuned down bass drum and hats. Tuned up snare, toms and cymbals.
5	Vintage Kit	VintageTune5	VINTAGE.T3A	5	Tuned down snare with tuned up bass drum and hats.
6	Vintage Kit	Vintage PA	VINTAGE.T3A	6	PA mix with quieter cymbals and hi hat and narrower panning.
