

METALLO PHONE

Alloyed with sound.

Designed to support new players in the best possible way, the new Metallophone YT-2030MS from Yamaha benefits from professional specifications such as gas spring height adjustment, a

parallel damper action and a new bar material for a warmer sound. In combination, these elements offer superb playability and support players as they progress.

TECHNICAL SPECIFICATIONS AND DESIGN INNOVATIONS.

Gas Spring Height Adjustment

The new gas spring height adjustment system gives the player the most direct and easy height adjustment ever possible on a mallet instrument. Range: 66cm – 85cm

Vibration-damping Rubber Joints Below Side Frame

Flexible design allows the player to adjust each side of the instrument separately. The vibration dampener reduces the amount of floor noise when played.

Flexible Disc Vibration Damper

Damper Belt with Buckle

With the addition of the belt dampening link it's now easy and safe to adjust the instrument's height and it also gives players a smooth damper feeling allowing for damper effects. High quality

POM plastic buckles were tested 10,000 x without any reduction in grip or general functionality. High density polyester twill woven belt. Bent metal rods and worn-out screw threads are history.

Sound Bar Material

The YT-2030MS utilises the same high-quality aluminium alloy which is also used for Yamaha's Celestas. The material produces a soft and warm tone that blends beautifully into ensembles. Range: C40 – C76 (c1-c4)

Large stoppable casters

Enlarged casters for improved manoeuvrability. The two casters at the player's position have a brake function.

Parallel Damper Action

The new parallel damper action offers smooth dampening options. Naturals and accidentals are dampened and released simultaneously.
