SoundCap, a new sound signal processing technology from Yamaha, limits audio pick-up range so that you can hold meetings in open workspaces without being disrupted by surrounding noise. Use SoundCap to enable comfortable communication, even in noisy open workspaces.

COEXISTING WITH COVID-19: GUIDELINES FOR REMOTE CONFERENCING SPACES

**Does Your Usual Remote Conferencing Setup Make New Social Distancing Guidelines Possible?
Do Noisy Surroundings Interfere With Communication When Remote Conferencing In Open Workspaces?**

Concerns regarding office and conference room environments are issues many of us are facing in adapting to the new normal, but simply making a few additions to your usual meeting setup can make all the difference. Let us show you how our solutions can help, along with exactly how to implement them

MICROPHONE EXTENSION CAPABILITIES!

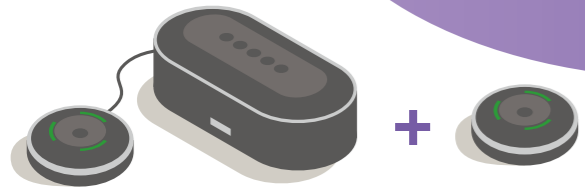

Before

*Recommended pick-up range per each microphone

PICK-UP RANGE: 3 M RADIUS

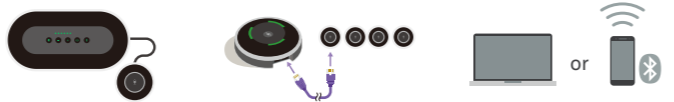

YVC-1000

Extension Microphone

- ✓ Connectivity and scalability unmatched by any other speakerphone on the market
- ✓ Connect up to five extension microphone pods (3 mics per pod) using a single cable to enjoy flexible positioning for any layout

HOW TO CONNECT

- 1 Plug the power cable into an AC100V power source
- 2 Connect up to 4 extension microphones (total of 5 microphones)
- 3 Connect to your PC/Mac or mobile device

CS-700

Extension Microphone

- ✓ Speakerphone with an integrated camera takes up less desk space
- ✓ Use an extension microphone to increase pick-up range

HOW TO CONNECT

- 1 Plug the power cable into an AC100V power source
- 2 Connect an extension microphone
- 3 Connect to your PC/Mac or mobile device

Before

PICK-UP RANGE: 4.5 M RADIUS

Before

*Recommended pick-up range per individual microphone

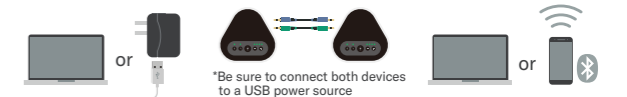

YVC-330

YVC-330

- ✓ The definitive speakerphone for remote communication in office
- ✓ Daisy-chain two units for expandability

HOW TO CONNECT

- 1 Connect to your PC/Mac
- 2 Connect using daisy-chain cable
- 3 Connect to your PC/Mac or mobile device

*Be sure to connect both devices to a USB power source

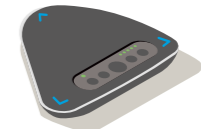

MEETING IN OPEN WORKSPACES!

PICK-UP RANGE: 1 M RADIUS

SoundCap

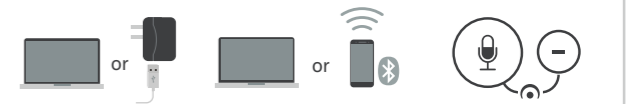

YVC-330

- ✓ "SoundCap" is like an invisible sound barrier that creates a sound environment similar to that of a private space

HOW TO CONNECT

- 1 Connect to your PC/Mac
- 2 Connect to your PC/Mac or mobile device
- 3 Press the Mic Mute and Volume buttons simultaneously

*SoundCap is a unique Yamaha sound signal processing technology that enables comfortable remote communication, even in noisy environments.
