

# **Previous AG08 Controller**

## **version information**

### **V1.0.0 to V1.5.0**

- STEREO PAIR function has been added that allows channel 1 and channel 2 to be treated as a single stereo channel.
- In addition to changing parameters with sliders and handles, direct numeric input is now possible.
- DELAY can now be set for STREAMING OUT.
- Added ATTACK parameter to DUCKER.
- Different FX sends can now be set for each FX effect type.
- New presets have been added for channel 1 and channel 2.
- If the AG08 firmware version is older than the one included with the AG08 Controller, the firmware update screen will automatically appear.
- Includes updated firmware.
- Resolved some minor problems.

### **AG08 Firmware**

### **V1.00 to V1.50**

- Improvements made to always apply the effect when the voice changer is on, regardless of the input level.

## **V1.0.0**

- First Release version.
