

PORTATONE

Owner's Manual

SPECIAL MESSAGE SECTION

This product utilizes batteries or an external power supply (adapter). DO NOT connect this product to any power supply or adapter other than one described in the manual, on the name plate, or specifically recommended by Yamaha.

This product should be used only with the components supplied or; a cart, rack, or stand that is recommended by Yamaha. If a cart, etc., is used, please observe all safety markings and instructions that accompany the accessory product.

SPECIFICATIONS SUBJECT TO CHANGE:

The information contained in this manual is believed to be correct at the time of printing. However, Yamaha reserves the right to change or modify any of the specifications without notice or obligation to update existing units.

This product, either alone or in combination with an amplifier and headphones or speaker/s, may be capable of producing sound levels that could cause permanent hearing loss. DO NOT operate for long periods of time at a high volume level or at a level that is uncomfortable. If you experience any hearing loss or ringing in the ears, you should consult an audiologist.

IMPORTANT: The louder the sound, the shorter the time period before damage occurs.

NOTICE:

Service charges incurred due to a lack of knowledge relating to how a function or effect works (when the unit is operating as designed) are not covered by the manufacturer's warranty, and are therefore the owners responsibility. Please study this manual carefully and consult your dealer before requesting service.

ENVIRONMENTAL ISSUES:

Yamaha strives to produce products that are both user safe and environmentally friendly. We sincerely believe that our products and the production methods used to produce them, meet these goals. In keeping with both the letter and the spirit of the law, we want you to be aware of the following:

Battery Notice:

This product MAY contain a small non-rechargeable battery which (if applicable) is soldered in place. The average life span of this type of battery is approximately five years. When replacement becomes necessary, contact a qualified service representative to perform the replacement. This product may also use "household" type batteries. Some of these may be rechargeable. Make sure that the battery being charged is a rechargeable type and that the charger is intended for the battery being charged.

When installing batteries, do not mix batteries with new, or with batteries of a different type. Batteries MUST be installed correctly. Mismatches or incorrect installation may result in overheating and battery case rupture.

Warning:

Do not attempt to disassemble, or incinerate any battery. Keep all batteries away from children. Dispose of used batteries promptly and as regulated by the laws in your area. Note: Check with any retailer of household type batteries in your area for battery disposal information.

Disposal Notice:

Should this product become damaged beyond repair, or for some reason its useful life is considered to be at an end, please observe all local, state, and federal regulations that relate to the disposal of products that contain lead, batteries, plastics, etc. If your dealer is unable to assist you, please contact Yamaha directly.

NAME PLATE LOCATION:

The name plate is located on the bottom of the product. The model number, serial number, power requirements, etc., are located on this plate. You should record the model number, serial number, and the date of purchase in the spaces provided below and retain this manual as a permanent record of your purchase.

FCC INFORMATION (U.S.A.)

1. IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

- 2. IMPORTANT: When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product MUST be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.
- 3. NOTE: This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class "B" digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference with other electronic devices. This equipment generates/ uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of

other electronic devices. Compliance with FCC regulations does not guarantee that interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit "OFF" and "ON", please try to eliminate the problem by using one of the following measures:

Relocate either this product or the device that is being affected by the interference.

Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.

In the case of radio or TV interference, relocate/reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to co-axial type cable.

If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Corporation of America, Electronic Service Division, 6600 Orangethorpe Ave, Buena Park, CA90620

The above statements apply ONLY to those products distributed by Yamaha Corporation of America or its subsidiaries.

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

* Please keep this manual in a safe place for future reference.

WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/AC power adaptor

- Only use the voltage specified as correct for the instrument. The required voltage is printed on the name plate of the instrument.
- Use the specified adaptor (PA-3B, PA-3C or an equivalent recommended by Yamaha) only. Using the wrong adaptor can result in damage to the instrument or overheating.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Do not place the AC adaptor cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.

Do not open

 Do not open the instrument or attempt to disassemble the internal parts or modify them in any way. The instrument contains no user-serviceable parts. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the instrument to rain, use it near water or in damp or wet conditions, or place containers on it containing liquids which might spill into any openings.
- · Never insert or remove an electric plug with wet hands.

Fire warning

Do not put burning items, such as candles, on the unit.
 A burning item may fall over and cause a fire.

If you notice any abnormality

If the AC adaptor cord or plug becomes frayed or damaged, or if there is a
sudden loss of sound during use of the instrument, or if any unusual smells or
smoke should appear to be caused by it, immediately turn off the power
switch, disconnect the adaptor plug from the outlet, and have the instrument
inspected by qualified Yamaha service personnel.

CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the instrument or other property. These precautions include, but are not limited to, the following:

Power supply/AC power adaptor

- When removing the electric plug from the instrument or an outlet, always hold the plug itself and not the cord.
- Unplug the AC power adaptor when not using the instrument, or during electrical storms.
- Do not connect the instrument to an electrical outlet using a multipleconnector. Doing so can result in lower sound quality, or possibly cause overheating in the outlet.

Battery

- Always make sure all batteries are inserted in conformity with the +/- polarity markings. Failure to do so might result in overheating, fire, or battery fluid leakage.
- Always replace all batteries at the same time. Do not use new batteries
 together with old ones. Also, do not mix battery types, such as alkaline
 batteries with manganese batteries, or batteries from different makers, or
 different types of batteries from the same maker, since this can cause
 overheating, fire, or battery fluid leakage.
- Do not dispose of batteries in fire.

- · Do not attempt to recharge batteries that are not intended to be charged.
- When the batteries run out, or if the instrument is not to be used for a long time, remove the batteries from the instrument to prevent possible leakage of the battery fluid.
- · Keep batteries away from children.
- If the batteries do leak, avoid contact with the leaked fluid. If the battery fluid should come in contact with your eyes, mouth, or skin, wash immediately with water and consult a doctor. Battery fluid is corrosive and may possibly cause loss of sight or chemical burns.

Location

- Do not expose the instrument to excessive dust or vibrations, or extreme cold
 or heat (such as in direct sunlight, near a heater, or in a car during the day) to
 prevent the possibility of panel disfiguration or damage to the internal
 components.
- Do not use the instrument in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the instrument, TV, or radio may generate noise.
- Do not place the instrument in an unstable position where it might accidentally fall over.

- Before moving the instrument, remove all connected adaptor and other cables.
- Use only the stand specified for the instrument. When attaching the stand or rack, use the provided screws only. Failure to do so could cause damage to the internal components or result in the instrument falling over.

Connections

Before connecting the instrument to other electronic components, turn off the
power for all components. Before turning the power on or off for all
components, set all volume levels to minimum. Also, be sure to set the
volumes of all components at their minimum levels and gradually raise the
volume controls while playing the instrument to set the desired listening level.

Maintenance

 When cleaning the instrument, use a soft, dry cloth. Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Handling caution

Do not insert a finger or hand in any gaps on the instrument.

- Never insert or drop paper, metallic, or other objects into the gaps on the panel or keyboard. If this happens, turn off the power immediately and unplug the power cord from the AC outlet. Then have the instrument inspected by qualified Yamaha service personnel.
- Do not place vinyl, plastic or rubber objects on the instrument, since this
 might discolor the panel or keyboard.
- Do not rest your weight on, or place heavy objects on the instrument, and do not use excessive force on the buttons, switches or connectors.
- Do not operate the instrument for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.

Saving data

Saving and backing up your data

The panel settings and some other types of data will be lost if the power is
turned off before they are saved. Be sure to save data you want to keep to the
internal Flash Memory (page 29) before turning off the power. Saved data may
be lost due to malfunction or incorrect operation. Save the important data to
your computer. For information on sending the data, see page 63.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the instrument, or data that is lost or destroyed.

Always turn the power off when the instrument is not in use.

When using a power adaptor, even when the power is off, electricity is still flowing to the instrument at the minimum level. When you are not using the instrument for a long time, make sure you unplug the AC power adaptor from the wall AC outlet.

Make sure to discard used batteries according to local regulations.

- The illustrations and LCD screens as shown in this owner's manual are for instructional purposes only, and may appear somewhat different from those on your instrument.
- Unless otherwise indicated, the example panel control illustrations, Keyboard illustrations and LCD screenshots are taken from the PSR-E303.

Copyright Notice

The following is the title, credits, and copyright notices for the song pre-installed in this electronic.

Can You Feel The Love Tonight

Congratulations and thank you for purchasing the Yamaha PSR-E303/YPT-300 PORTATONE!

Please read this owner's manual carefully before using the instrument in order to take full advantage of its various features.

Make sure to keep this manual in a safe and handy place even after you finish reading, and refer to it often when you need to better understand an operation or function.

Panel logos

GM System Level 1

"GM System Level 1" is an addition to the MIDI standard which ensures that any GM-compatible music data can be accurately played by any GM-compatible tone generator, regardless of manufacturer. The GM mark is affixed to all software and hardware products that support GM System Level.

XGlite

As its name implies, "XGlite" is a simplified version of Yamaha's high-quality XG tone generation format. Naturally, you can play back any XG song data using an XGlite tone generator. However, keep in mind that some songs may play back differently compared to the original data, due to the reduced set of control parameters and effects.

Stereo Sampled Piano

The instrument has a special Portable Grand Piano Voice—created by state-of-the-art stereo sampling technology and using Yamaha's sophisticated AWM (Advanced Wave memory) tone generation system.

Yamaha Education Suite 5

The instrument features the new Yamaha Education Suite—a set of learning tools that utilize the latest technology to make studying and practicing music more fun and fulfilling than ever before!

Touch Response

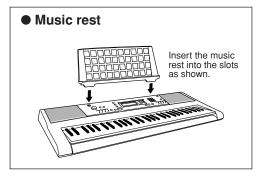

The exceptionally natural Touch Response feature, with a convenient front panel on/off switch, gives you maximum expressive level control over the voices.

Supplied Accessories

The PSR-E303/YPT-300 package includes the following items. Please check that you have them all.

Be sure to do the following operations BEFORE turning on the power.

Power Requirements

Although the instrument will run either from an optional AC adaptor or batteries, Yamaha recommends use of an AC adaptor whenever possible. An AC adaptor is more environmentally friendly than batteries and does not deplete resources.

■ Using an AC Power Adaptor -

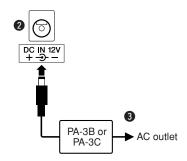

• Make sure that the power of the instrument is off (the backlit display is off).

MARNING

- Use ONLY a Yamaha PA-3B or PA-3C AC Power Adaptor (or other adaptor specifically recommended by Yamaha) to power your instrument from the AC mains.
 The use of other adaptors may result in irreparable damage to both the adaptor and the instrument.
- 2 Connect the AC adaptor (PA-3B, PA-3C or other adaptor specifically recommended by Yamaha) to the power supply jack.
- 3 Plug the AC adaptor into an AC outlet.

A CAUTION

 Unplug the AC Power Adaptor when not using the instrument, or during electrical storms.

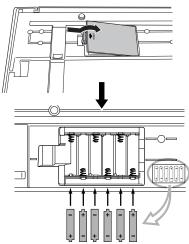

■ Using Batteries

- **1** Open the battery compartment cover located on the instrument's bottom panel.
- 2 Insert the six new alkaline batteries, being careful to follow the polarity markings on the side of the compartment.
- **3** Replace the compartment cover, making sure that it locks firmly in place.

⚠ CAUTION

 Never connect or disconnect the AC power adaptor when the batteries are installed in the instrument and the power is on. Doing so will turn the power off, possibly resulting in loss of the data being transferred and the data currently in the transfer destination during transferring or recording a data.

For battery operation the instrument requires six 1.5V "AA" size, LR6 or equivalent batteries. (Alkaline batteries are recommended.) When battery power becomes too low for proper operation, the volume may be reduced, the sound may be distorted, and other problems may occur. When this happens, make sure to replace all batteries, following the precautions listed below.

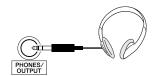

If necessary, also make sure to save all important User data (see page 29), since custom panel settings are lost when the batteries are removed.

A CAUTION

- Use alkaline batteries for this instrument. Other types of batteries (including rechargeable batteries) may have sudden drops of power when battery power becomes low, possibly resulting in loss of data in the flash memory.
- Make sure to install the batteries with the proper orientation, maintaining the correct polarity (as shown). Incorrect battery installation may result in heat, fire and/or leaking of corrosive chemicals.
- When the batteries run down, replace them with a complete set of six new batteries. NEVER mix old and new batteries. Do not use different kinds of batteries (e.g. alkaline and manganese) at the same time.
- If the instrument is not to be in use for a long time, remove the batteries from it, in order to prevent possible fluid leakage from the battery.
- Please use the power adaptor when transferring data to flash memory. Batteries (including rechargeable types) can be drained rapidly by this type of operation. If the batteries do become drained during a data transfer, both the data being transferred and the data currently in the transfer destination will be lost.

Make all necessary connections BEFORE turning the power on.

Connecting headphones (PHONES/OUTPUT Jack)

The PSR-E303/YPT-300 speakers are automatically shut off when a plug is inserted into this jack. The PHONES/OUTPUT jack also functions as an external output.

You can connect the PHONES/OUTPUT jack to a keyboard amplifier, stereo system, mixer, tape recorder, or other line-level audio device to send the instrument's output signal to that device.

⚠ WARNING

 Avoid listening with the headphones at high volume for long periods of time; doing so may not only result in ear fatigue, it may be damaging to your hearing.

⚠ CAUTION

• To prevent damage to the speakers, set the volume of the external devices at the minimum setting and turn power off the devices before connecting them. Failure to observe these precautions may result in electric shock or equipment damage. Also, be sure to set the volumes of all devices at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.

Connecting a footswitch (SUSTAIN Jack)

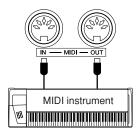

The sustain function lets you produce a natural sustain as you play by pressing an optional footswitch. Plug the Yamaha FC4 or FC5 footswitch into this jack and use it to switch sustain on and off.

- Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power.
- Do not press the footswitch while turning the power on. Doing this changes the recognized polarity of the footswitch, resulting in reversed footswitch operation.

Using the MIDI Terminals

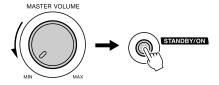

The instrument also features MIDI terminals, allowing you to interface the instrument with other MIDI instruments or computers. (For more information, see page 58.)

 MIDI cables (sold separately) must be used for connecting to MIDI devices. They can be bought at music stores, etc.

Turn on the power

Turn down the volume by turning the [MASTER VOLUME] control to the left and press the [STANDBY/ON] switch to turn on the power. Pressing the switch again turns the power off.

Backup data in the flash memory (page 29) is loaded to the instrument when the power is turned on. If no backup data exists on flash memory, all instrument settings are restored to the initial factory defaults when the power is turned on.

A CAUTION

 When using a power adaptor, even when the power is off, a small amount of electricity is still being consumed by the instrument. When you are not using the instrument for a long time, make sure to unplug the AC power adaptor from the wall AC outlet, and/or remove the batteries from the instrument.

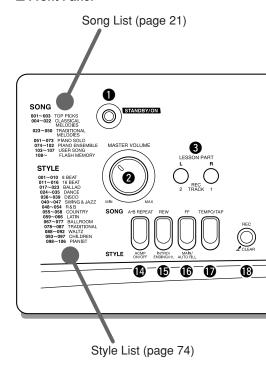

A CAUTION

 Never attempt to turn the power off when a "Writing!" message is shown in the display. Doing so can damage the flash memory and result in a loss of data.

- Quick Guide -

Changing the Voices

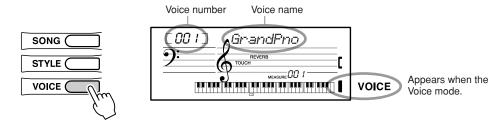

Try playing a variety of instrument Voices

In addition to the piano Voice, a wide variety of other instrument Voices can be selected and played, including guitar, trumpet and flute. The Voice selected here becomes the Main Voice.

1

Press the [VOICE] button.

The Voice number and name are displayed.

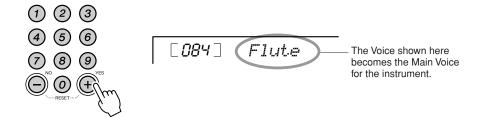

2

Select a Voice.

Select the desired Voice by using the number buttons [0]-[9], [+],

Refer to the Voice List on page 65.

3

Play the keyboard.

Try selecting and playing different Voices.

Playing Two Voices Simultaneously—Dual

You can select a second Voice which will play in addition to the Main Voice selected on the previous page. This second Voice is known as the Dual Voice.

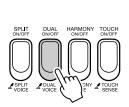

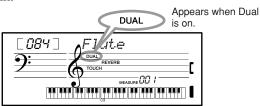

Play the Dual Voice

Press the [DUAL ON/OFF] button to turn the Dual function on.

When Dual is on, you can play a Dual Voice in a layer with the Main Voice.

To turn the Dual Voice off and play only the Main Voice, press the [DUAL ON/OFF] button again.

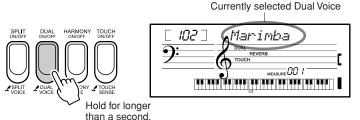

Selecting a Dual Voice

The best-suited Dual Voice is automatically selected whenever you turn Dual on, but you can select any of the available Dual Voices.

1

Press and hold the [DUAL ON/OFF] button for longer than a second.

"D. Voice" appears in the display for a few seconds, then the Dual Voice will appear.

 You can also access the Dual Voice setting display by pressing the [FUNC-TION] button several times, then selecting Dual Voice.

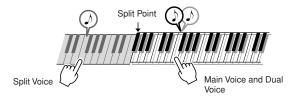

Select a Dual Voice.

Select the desired Dual Voice by using the number buttons [0]-[9], [+], [-].

Refer to the Voice List on page 65.

Playing Different Voices with the Left and Right Hands—Split

In the Split mode you can play different Voices to the left and right of the keyboard "Split Point." The main and Dual Voices can be played to the right of the Split Point, while the Voice played to the left of the Split Point is known as the "Split Voice"

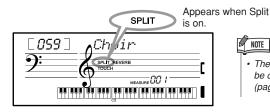

Play the Split Voice

Press the [SPLIT ON/OFF] button to turn the Split function on.

When Split is on you can play a Split Voice to the left of the Split

When you don't want to play a Split Voice, press the [SPLIT ON/ OFF] button to turn Split off.

 The Split Point setting can be changed as required (page 44).

Select a Split Voice

You can select a different Split Voice by following the procedure outlined below.

Press and hold the [SPLIT ON/OFF] button for longer than a second.

"S. Voice" appears in the display for a few seconds, then the Split Voice will appear.

· You can also access the Split Voice setting display by pressing the [FUNC-TION] button several times, then selecting the Split

Select a Split Voice

Select the desired Split Voice by using the number buttons [0]-[9], [+], [-].

Refer to the Voice List on page 65.

Playing the Grand Piano Voice

When you simply want to play a piano Voice, all you have to do is press one convenient button.

Press the [PORTABLE GRAND] button.

The Voice "Grand Piano 001" will automatically be selected as the Main Voice.

Drum kits

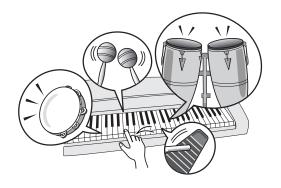

Drum kits are collections of drum and percussion instruments.

When drum kits (Voice number 109-121) are selected, you can play different percussion sounds directly from the keyboard.

Press the [VOICE] button.

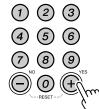

2

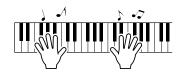

Select the desired Drum kit.

Select one of the Voice numbers from 109-121 by using the number buttons [0]-[9], [+], [-].

Example: 109 Standard Kit 1

Try out each key.

You'll hear bongo drums, congas, maracas, and more—a comprehensive variety of drum and percussion sounds.

Details on the instruments and key assignments of each drum kit can be found in the Drum Kit List on page 71.

Drum Kit List

| 109 | Standard Kit 1 | 116 | Jazz Kit |
|-----|----------------|-----|------------------|
| 110 | Standard Kit 2 | 117 | Brush Kit |
| 111 | Room Kit | 118 | Symphony Kit |
| 112 | Rock Kit | 119 | SFX Kit 1 |
| 113 | Electronic Kit | 120 | SFX Kit 2 |
| 114 | Analog Kit | 121 | Sound Effect Kit |
| 115 | Dance Kit | | |

Quick Guide —

n Sounds

This instrument also includes a wide range of unique sound effects. Try out each key and enjoy the sounds! As you try out the various keys you'll hear the sound of a dog barking, running water, a creaking door and many other unique effects.

Press the [SOUND EFFECT KIT] button.

Try out each key and enjoy the sounds. Don't forget the black keys!

You'll be able to play various sound effects from the keyboard: barking, braying, yelling, and much more.

After trying out these sounds, press the [PORTABLE GRAND] button to reset the instrument Voice to the default setting of Voice "001 Grand Piano."

- Quick Guide -

Play With The Metronome

Start the metronome

The instrument includes a metronome with adjustable tempo and time signature. Play and set the tempo that is most comfortable for you.

Starting the metronome

Turn the metronome on and start it by pressing the [METRONOME ON/ OFF] button.

To stop the metronome, press the [METRONOME ON/OFF] button again.

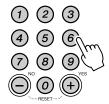

Setting the metronome tempo

Press the [TEMPO/TAP] button to display the tempo.

Set the metronome tempo by using the number buttons [0]-[9], [+], [-]. The tempo can be adjusted between 32-280.

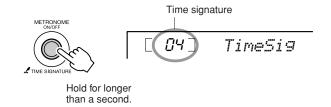

Setting the Metronome Time Signature

A chime will sound on the first beat of each measure, while a metronome click will sound on all others. You can also set the time signature to "00," in which case the chime will not sound and the click sound will be heard on all beats.

Press and hold the [METRONOME ON/OFF] button for longer than a second

The time signature appears in the display.

Set the time signature by using the number buttons [0]-[9], [+], [-].

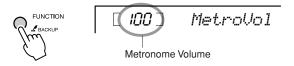

The metronome can be set for time signatures of 0 to 15 beats.

 The time signature cannot be changed for Songs and Styles, because each has a fixed time signature.

Setting the Metronome Volume

Press the [FUNCTION] button a number of times until "MetroVol" appears.

2 Set the metronome volume by using the number buttons [0]-[9], [+], [-].

— Quick Guide —

Playing Songs

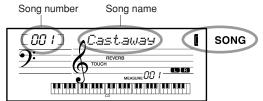

Select and Listen to a Specific Song

This instrument has 102 built-in Songs. Listening to a Song

Press the [SONG] button.

The Song number and name are displayed.

Appears when the Song mode is active.

Select the desired Song by using the number buttons [0]-[9], [+], [-].

Refer to the Song List on next page.

| 001-102 | Built in Songs (see next page) |
|---------|--|
| 103-107 | User Songs (Songs you record yourself). |
| 108- | Songs transferred from a computer on page 63 |

 You can play Songs recorded from the instrument or transferred from a computer. The procedure for playing these Songs is the same as that of the built-in Songs.

Press the [START/STOP] button.

The Song will begin playing.

You can stop playback at any time by pressing the [START/STOP] button.

Other Operations

[REW] button Fast-reverses the Song if pressed during playback (no sound is heard during fast reverse). Decreases the measure number if pressed while playback is stopped.

[FF] button...... Fast-forwards the Song if pressed during playback. Increases the measure number if pressed while playback is stopped.

[PAUSE] button Temporarily stops playback. Press this button a second time to resume playback from the point at which it was stopped.

• Using the [DEMO] button

Press the [DEMO] button to play Songs 001, 002, 003, 004, 025, 041, 064, 084, 081 in sequence, and playback will continue repeatedly starting again from the first Song 001.

You can stop playback at any time by pressing the [DEMO] button.

Song List

| No. | Song Name | No. | Song Name | No. | Song Name |
|------|--|-----|---|-----|---|
| | TOP PICKS | 036 | Yankee Doodle (Traditional) | 069 | Pastorale (J. F. Burgmüller) |
| 001 | Castaway | 037 | Muffin Man (Traditional) | 070 | The Last Rose of Summer |

| 035 | Mary Had a Little Lamb (Traditional) | | | | |

[·] Songs with an asterisk mark (*) are ones which do not have a left part. Therefore, the lesson is applicable only for the right hand.

Some of the classic and/or traditional songs have been edited for length or for ease in learning, and may not be exactly the same as the original.

- Quick Guide -

Play with a Style

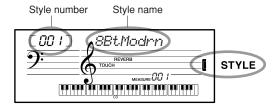

Selecting a rhythm of a Style

The Style feature provides backing and rhythm parts in a wide variety of musical categories, including rock, blues, techno and much more. Here's how to play a rhythm of a Style. The rhythm sound consists of percussion instruments.

1 Press the [STYLE] button.

The Style number and name are displayed.

Appears when the Style mode is

2 Select a Style.

Select the desired Style by using the number buttons [0]-[9], [+], [-].

Refer to the Style List on page 74.

1) (

Press the [START/STOP] button.

The Style rhythm will start.

You can stop playback at any time by pressing the [START/STOP] button.

Since the Pianist category Styles (098-106) have no rhythm parts, no sound will be produced if you start rhythm-only playback. To use these Styles, turn on the auto accompaniment and play the keyboard as described on pages 23-24. (The bass and chord accompaniment parts will sound.)

Playing with a Style

On the previous page, you've learned how to select your favorite rhythm of a Style. Here, you'll learn how to expand on that rhythm with bass and chord backing, and use all of it as your accompaniment as you play.

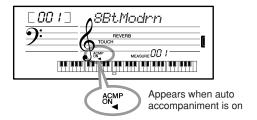

Press the [STYLE] button and then select a Style.

Turn auto accompaniment on.

Press the [ACMP ON/OFF] button.

Press the [ACMP ON/OFF] button again to turn the auto accompaniment off.

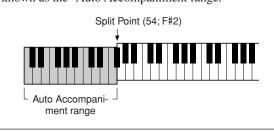

When auto accompaniment is on ...

The keys to the left of the Split Point (54; F#2) will play only chords.

This is known as the "Auto Accompaniment range."

 You can change the Split Point. Refer to "Setting the Split Point" on page 44.

Turn SYNC START on.

Press the [SYNC START] button.

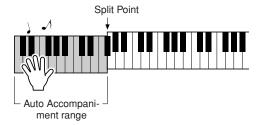

When the Sync Start standby mode is engaged, Style playback will begin as soon as you play a chord in the accompaniment range of the keyboard. You can turn off Sync Start standby mode by pressing the [SYNC START] button.

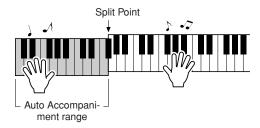

The Style will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

Not sure how to play chords? No problem! This instrument is capable of playing chords even if you only play one key. Try playing one, two or three keys (any notes will do) in the auto accompaniment range of the keyboard. Different keys will produce different results.

Refer to page 52 for detailed instructions for playing chords.

Try playing other chords with your left hand and play a melody with your right hand.

You can stop playback at any time by pressing the [START/STOP] button.

— Quick Guide —

Record your own performance

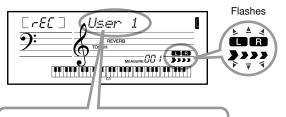

Recording Your Performance

You can record up to five of your own performances as User Songs (User 1-5: Song numbers 103-107). Think of each User Song as a kind of basket or drawer for storing your recording. Remember that you can also record a Style (containing chord changes) along with your own performance.

Press the [REC] button.

The lowest-numbered unrecorded User Song (Song numbers 103-107) available for recording is displayed. If you want to select the Song you will be recording, select the desired Song number by using the [+] and [-] buttons.

 A total of approximately 10,000 notes or 5,500 chord changes can be recorded to the five User Songs.

 Accompaniment cannot be turned on or off once the [REC] button is pressed.

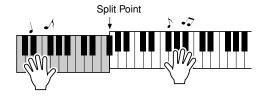

After you've selected the desired User Song for recording, you can select a Style to be recorded as well. To do this, press the [STYLE] button and select the Style number while the ACMP indication is on.

You can turn off the Record mode by pressing the [REC] button again (and stop flashing).

2

Start recording.

When you play the keyboard, recording will begin.

By playing keys to the left of the Split Point when the Auto Accompaniment is set to on, the Style starts sounding and is recorded with your performance.

When Auto Accompaniment is set to off, only your keyboard performance is recorded.

A CAUTION

If all User Songs (Song numbers 103-107) contain recorded data, Song 103 will automatically be selected. In this case, you will record over and erase any previous data in Song 103, so be careful that you won't be erasing any material you want to keep!

3 Stop recording.

Pressing the [START/STOP] button stops recording and writes the data to the User Song. (A "Writing!" message is shown.)

To playback the newly recorded performance, press the [START/STOP] button.

● In order to record with the Style, turn the Auto Accompaniment to on (see Steps 1-2 on page 23), and then record according to the instructions.

● In order to record only your performance, turn the Auto Accompaniment to off and record according to the normal steps.

ACAUTION

 Never attempt to turn the power off when a "Writing!" message is shown in the display. Doing so can damage the flash memory and result in a loss of data.

A CAUTION

 Keep in mind that any kind of power failure during recording—such as the power being turned off, the AC adaptor being plugged/unplugged or the batteries running down will result in data loss.

 Use the Musicsoft Downloader to backup the User Songs to a computer (page 62).

Recording to a specified track

The User Songs are organized into two tracks: Track 1 and Track 2. You can specify the track you want to record to.

About track recording

If you start recording by specifying a track, the track will be overwritten (existing data in the track is deleted and replaced with the new recording).

Only your keyboard performance can be recorded to Track 1. Either a Style or your performance can be recorded to Track 2, resulting in a User Song like that depicted below.

 Record following the steps in the previous page, and your performance will be recorded to Track 1 and the Style (if you are playing one) will be recorded to Track 2.

NOTE

- You cannot record the metronome click, or the Transpose and Tuning settings.
- The settings and buttons below cannot be changed, or if changed, the new settings cannot be recorded if entered during the recording process.

ACMP ON/OFF, split point, reverb type, chorus type, harmony type, [FUNCTION] button, [PORTABLE GRAND] button, [SOUND EFFECT KIT] button.

Specifying track recording

Turn ACMP (auto accompaniment) on or off, depending on what you want to record.

If you want to record Style playback, turn ACMP on. If you want to record only your own keyboard performance, turn ACMP off.

Specify the track you want to record.

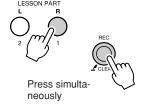

Specify the track 2 when you want to record the Style. When you want to record your own keyboard performance, you can specify either track.

Recording to Track 1 –

Press the [REC] button and [REC TRACK 1] button simultaneously.

- Keep in mind that both Tracks 1 and 2 will be overwritten with new data if you record without specifying the tracks.
- The both "L" and "R" flashes, this indicates that you have specified Track 1 when the Auto Accompaniment is on. If you want to record your own performance, press the [TRACK 2] button to stop the "L" flashing. If you want to record a Style, press the [REC] button to cancel the recording, and repeat the procedure from the beginning.

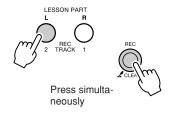

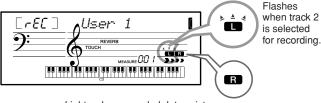

Flashes when track 1 is selected for recording.

Recording to Track 2 -

Press the [REC] button and [REC TRACK 2] button simultaneously.

Lights when recorded data exists.

Turns off when there is no recorded data, or when Mute

is set to on (page 38) to turn off playback of the track.

Press the [+], [-] buttons to select the User Song you want to record.

[rEC] User 3

If you want to record Style playback to Track 2, press the [STYLE] button and select the desired Style.

4 Start recording

Perform steps **2** and **3** on pages 25-26.

By playing keys to the left of the Split Point when the Auto Accompaniment is set to on, the Style starts sounding and is recorded. Only your performance is recorded by playing the keyboard (any key is OK) when the Auto Accompaniment is set to off.

 You can record a new track while listening to a previously recorded track (the track indication will appear). You can also mute recorded tracks (the track will disappear) while recording a new track by pressing the desired track button.

Deleting User Songs

Deleting an entire User Song

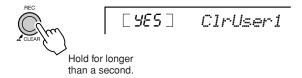

Press the [SONG] button and select the User Song you want to delete by using the number buttons [0]-[9], [+], [-].

| !!!!-! | II:=::::::::: 1 | |
|--------|-----------------|--|
| | | |

Press and hold the [REC] button for longer than a second.

The Song Delete display appears.

You can cancel the delete operation by pressing the [-/NO] button.

Press the [+/YES] button.

A confirmation message will appear on the display.

You can cancel the delete operation by pressing the [-/NO] button.

4 Press the [+/YES] button to delete the Song.

"Writing!" message will appear while the track is being deleted.

Backup and Initialization

Backup

Some internal parameters will revert to their default values if not saved before the power is turned off.

In order to backup these parameters press and hold the [FUNCTION] button for longer than a second.

Parameters that are saved in backup:

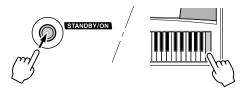

- User Songs*
- Touch Response on/off setting
- The following Function settings: Tuning, Split Point, Touch Sensitivity, Style Volume, Song Volume, Metronome Volume, Demo Cancel, Panel Sustain
- * The User Songs are automatically backed up when recording is completed, ensuring that the data is not deleted even when you fail to backup.

Initialization

This function erases all backup data in the instrument's flash memory and restores the initial default settings. The following initialization procedures are provided.

Backup Clear

To clear data backed up to the internal flash memory (described above), turn the power on by pressing the [STANDBY/ON] switch while holding the highest white key on the keyboard. The backed up data will be erased and the default values restored.

Flash Clear

To clear Song data that has been transferred to the internal flash memory from a computer, simultaneously hold down the highest white key and the three highest black keys on the keyboard and turn the power on by pressing the [STANDBY/ON] switch.

A CAUTION

When you execute the Backup Clear operation, backup parameters will be cleared. You can save the backup parameter (containing the five User Songs) by using Musicsoft Downloader to transfer them to a computer. Refer to the section "Transferring a user file from the PSR-E303/YPT-300 to a computer" on page 63.

A CAUTION

 When you execute the Flash Clear operation, Song data you have purchased and downloaded will also be cleared. Make sure to save your important data by transferring to a computer using Musicsoft Downloader (page 63).

Basic Operation and Displays

Basic Operation

Turn down the volume by turning the [MASTER VOLUME] control to the left and press the [STANDBY/ON] switch to turn on the power.

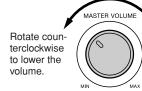

Press the [STANDBY/ON] switch again to turn the power OFF.

STANDBY/ON

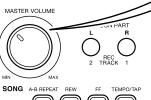

Adjusting the volume

Turn the [MASTER VOLUME] dial.

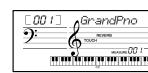

Rotate clockwise to increase the volume.

STANDBY/ON

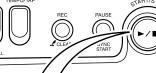

₹CHORD DICT

About the [START/STOP] button

Press the [START/STOP] button after pressing the [SONG] or [STYLE] button to start playback of the selected Song or Style (rhythm).

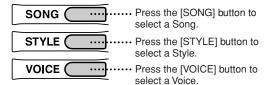

The "Press & Hold" Symbol

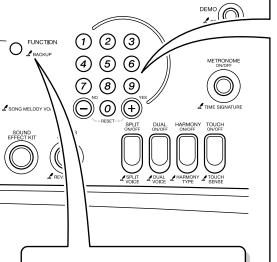

The "Press & Hold" symbol that appears next to some buttons indicates that the button can be pressed and held for longer than a second to call up a related or different function.

Press a button to select a basic function

When you select a basic function, the name and number of the currently selected Song, Style and Voice is shown. From this display, you can select the desired Song, Style or Voice.

Function Settings (page 56)

The [FUNCTION] button contains 32 settings.

Each time you press the [FUNC-TION] button, the setting item is selected in sequence, and the value of the selected item can be changed in the display.

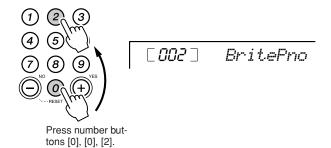

Set the number or value

Number buttons [0]-[9]

The number buttons can be used to directly enter a Song, Style or Voice number or parameter value.

For numbers that start with one or two zeroes, the first zeroes can be omitted

Example: Selecting Voice 002, Bright Piano.

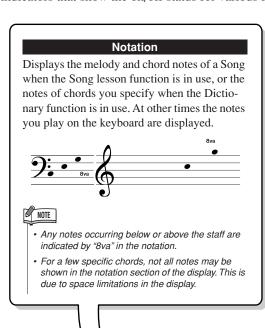

● [+], [-] buttons

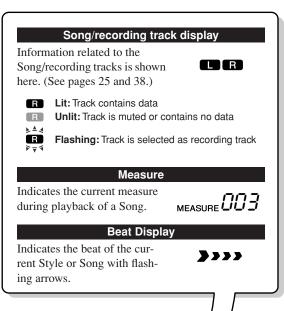

Press the [+] button briefly to increase the value by 1, or press the [-] button briefly to decrease the value by 1. Press and hold either button to continuously increase or decrease the value in the corresponding direction.

Display

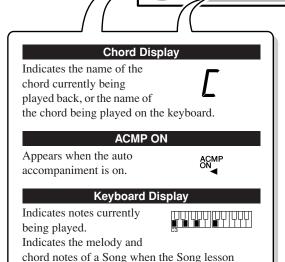

The Main display shows all of the current basic settings for Song, Style and Voice. It also includes a range of indicators that show the on/off status for various functions.

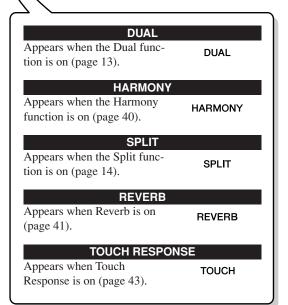

MEASURE 003

using the Dictionary function.

function is in use. Also indicates the notes of a

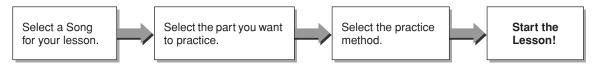

chord—either when playing a chord or when

Song Lesson

Yamaha Education Suite 5

You can select any Song you like and use it for a left-hand, right-hand, or both-hands lesson. Song Lesson lets you learn how to play Songs in three easy steps. Songs that can be used with the Lesson feature include Songs transferred from a computer to flash memory (SMF Format 0 only; see page 61). The procedure for transferring songs are described on page 63.

■ Lesson Flow

■ The practice methods:

Lesson 1 (Listen & Learn) Listen and learn the melody or rhythm of a selected Song.

Lesson 2 (Timing) Learn to play the notes at the correct timing along with the Song.

Lesson 3 (Waiting) Learn to play the correct notes.

Lesson 1 (Listen & Learn)

There's no need to play the keyboard in Lesson 1.

The model melody/chords (in other words, the musical material you should learn) of the part you selected will sound. Listen to it carefully and learn it well.

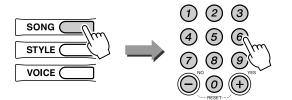

• User Songs cannot be used for the lesson.

1 Select the desired Song for your lesson.

Press the [SONG] button, and then select a Song (referring to the Song list on page 21) by using the number buttons [0]-[9], [+] and [-]. If you want to practice a Song you've transferred from a computer, select one of the Songs beginning from Song number 108.

 You cannot select the part during Song playback before Lesson 1 starts. If a Song is currently being played back, stop the Song first, then continue from Step 2.

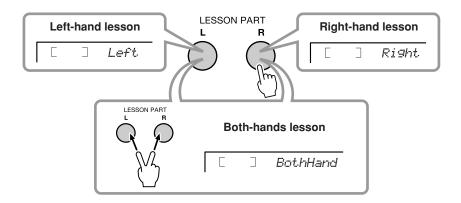

The instrument includes 102 built in Songs. Some Songs (as shown below) are intended for use as right-hand lessons, and cannot be used for left-hand or both-hands lessons.

Songs for right-hand lesson

Song numbers: 003-030

2 Select the part you want to practice.

Press the [R] button for a right-hand lesson, [L] button for a left-hand lesson, or press both the [R] and [L] buttons simultaneously for a both-hands lesson. The selected part is displayed.

A "No LPart" message is shown in the display if you select the left part in one of the Songs 003-030, which do not have left part data. These Songs cannot be used for left-hand or both-hands lessons.

 For songs transferred from a computer, the "No LPart" indication does not appear, even when there is no left hand part in the song.

3 Start Lesson 1.

Press the [LISTEN & LEARN] button to start Lesson 1. The melody of the part you selected in Step **2** will sound. Listen to it carefully and learn it well.

The notation and key positions of the model melody are shown in the display.

4 Stop the Lesson mode.

You can stop the Lesson mode at any time by pressing the [START/STOP] button.

- Even after Lesson 1 has started and the Song is playing, you can still select the part.
- When the melody Voice of the Song is changed, the key position shown in the display may be shifted (in octave units), depending on the Voice selected.
- You can select Lessons 1-3 by pressing the [LISTEN & LEARN], [TIMING] and [WAITING] buttons, respectively.

Lesson 2 (Timing)

In this lesson, try playing the notes with the correct timing. Simply concentrate on playing each note in time with the rhythmic accompaniment. The correct notes sound even if you play wrong notes as long as you play in time with the rhythm.

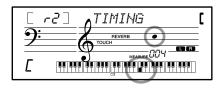

- 1 Select a Song for your lesson.
- 2 Select the part you want to practice.

Press the [TIMING] button to start Lesson 2.

Play the notes shown in the display. In Lesson 2, simply play each note in time with the music.

4 Stop the Lesson mode.

You can stop the Lesson mode at any time by pressing the [START/STOP] button.

NOTE

- You cannot use Dual or Split Voices during lessons.
- The Split Point is fixed and it cannot be changed. For the left-hand lesson, it is fixed at 59 or B2; for the left-hand chord lesson, it is fixed at 54 or F#2.

 You cannot select the part during Song playback before Lesson 2 starts. If a Song is currently being played back, stop the Song first, then continue from Step 2.

• Even after Lesson 2 has started and the Song is playing, you can still select the part.

Grade

When the lesson Song has played all the way through in Lesson mode 2 or 3, your performance will be evaluated in four levels: OK, Good, Very Good, or Excellent.

OK Good Very Good Excellent

Lesson 3 (Waiting)

In this mode, try playing the correct notes. The notes you should play appear in the score and the keyboard on the display. The Song pauses until you play the right note.

1 Select a Song for your lesson.

 You cannot select the part during Song playback before Lesson 3 starts. If a Song is currently being played back, stop the Song first, then continue from Step 2.

2 Select the part you want to practice.

3 Start Lesson 3.

Press the [WAITING] button to start Lesson 3.

NOTE

• Even after Lesson 3 has started and the Song is playing, you can still select the part.

Play the notes shown in the display.

Try playing the correct notes.

4 Stop the Lesson mode.

You can stop the Lesson mode at any time by pressing the [START/STOP] button.

Song settings

Changing the Melody Voice

You can change a Song's melody Voice to any other Voice you prefer.

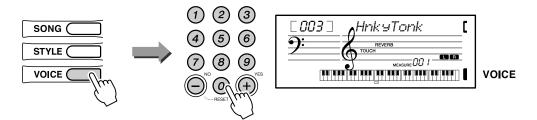

You cannot change the melody Voice of a User Song.

1 Select the Song and play it.

Refer to the section "Playing Songs" on page 20.

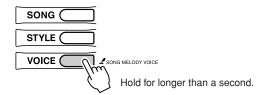

2 Select a desired Voice by using the number buttons [0]- [9], [+], [-].

The selected Voice sounds when you play the keyboard. If a Song has played through and stopped during this procedure, press the [START/STOP] button to start playback again.

3 Press and hold the [VOICE] button for longer than a second.

"SONG MELODY VOICE" appears in the display for a few seconds, indicating that the Voice selected in Step **2** has replaced the Song's original melody Voice.

Song Volume

This procedure allows you to adjust the balance between Song playback and the notes you play on the keyboard by setting the volume of the playback sound.

1 Press the [SONG] button.

2 Press the [FUNCTION] button a number of times until "SongVol" appears.

3 Set the Song Volume by pressing the number buttons [0]- [9], [+], [-].

 Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (100).

Mute

You can mute Track 1 or Track 2 during Song playback.

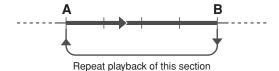

- Track 1 can be muted by pressing the [REC TRACK 1] button during Song playback.
- Track 2 can be muted by pressing the [REC TRACK 2] button during Song playback.

You can cancel the mute function by pressing the corresponding track buttons, [TRACK 1] or [TRACK 2] again during Song playback, or by selecting any other Song.

Practice Makes Perfect

You can repeatedly practice a section you find difficult. This function lets you specify a section of a Song you want to practice—"A" is the start point and "B" is the end point—for repeat playback.

Play the Song and press the [A-B REPEAT] button at the beginning of the section you want to repeat (the "A" point).

"A-REPEAT" will be displayed.

2 Press the [A-B REPEAT] button a second time at the end of the section you want to repeat (the "B" point). The specified A-B section of the Song will now play repeatedly, letting you practice the section over and over.

You can stop repeat playback by pressing the [A-B REPEAT] button. The A-B REPEAT mode will be canceled and normal playback of the Song will continue.

- The repeat start and end points can be specified in one-measure increments.
- You can also set the A-B Repeat function when the Song is stopped. Simply use the [REW] and [FF] buttons to select the desired measures, pressing the [A-B REPEAT] button for each point, then start playback.
- If you want to set the start point "A" at the very beginning of the Song press the [A-B REPEAT] button before starting playback of the Song.

 The A-B Repeat function will be canceled when you select another Song or Style mode.

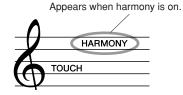

Play With a Variety of Effects

Adding Harmony

This feature adds harmony notes as well as tremolo or echo effects to the Main Voice.

Press the [HARMONY] button to turn harmony on.
When you don't want to add harmony notes, press the [HARMONY ON/OFF] button again to turn Harmony off.

 When you press the [HAR-MONY ON/OFF] button to turn this feature on, the appropriate Harmony type for the currently selected Main Voice is automatically selected.

2 Press and hold the [HARMONY ON/OFF] button for longer than a second.

"HarmType" appears in the display for a few seconds, followed by the Harmony Type.

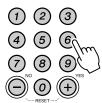

- You can also access the Harmony Type setting display by pressing the [FUNCTION] button several times.
- Harmony will be turned off if the Chord Dictionary function is used.

3 Select a desired Harmony Type by using the number buttons [0]-[9], [+], [-1.

Refer to the Harmony Type list on page 75.

Try playing the keyboard with the harmony function. The effect and operation of each Harmony Type is different—refer to the section "How to sound each Harmony Type" on the next page as well as the Harmony Type List for details.

Harmony type 01-05

Press the right-hand keys while playing chords in the auto accompaniment range of the keyboard when the Auto Accompaniment is on (page 23).

· Harmony type 06-12 (Trill)

Hold down two keys.

Harmony type 13-19 (Tremolo)

Keep holding down the keys.

· Harmony type 20-26 (Echo)

Keep holding down the keys.

You can adjust the Harmony Volume in the Function Settings (page 56).

- The harmony notes can be added only to the Main Voice, not to Dual or Split Voices
- The keys left of the Split Point of the keyboard produce no harmony notes when the auto accompaniment is on (ACMP ON is lit).

Adding Reverb

Reverb adds the ambience of a room or concert hall to the sound that you play on the keyboard.

To add Reverb

Press the [REVERB ON/OFF] button to turn Reverb on. Reverb is normally on. You can check how the selected Reverb Type sounds by playing the keyboard. To turn Reverb off, press the [REVERB ON/OFF] button again.

Select a Reverb Type

The ideal type is automatically selected whenever you select a Song or Style, but you can select any of the available Reverb Types.

Press and hold the [REVERB ON/OFF] button for longer than a second. "REVERB" appears in the display for a few seconds, followed by the Reverb Type.

2 Select the desired Reverb Type by using the number buttons [0]-[9], [+], [-]. Refer to the Reverb Type list on page 75 for

You can adjust the Reverb depth in the Function Settings (page 56).

You can also access the Reverb Type setting display by pressing the [FUNC-TION] button several times.

Adding Chorus

details.

This effect makes the Voice sound richer, warmer and more spacious. The best-suited Chorus type is automatically selected whenever you select a Voice; however, you can select any of the available types.

1 Press the [FUNCTION] button a number of times until the "Chorus" appears.

"Chorus" appears in the display for a few seconds, followed by the Chorus Type.

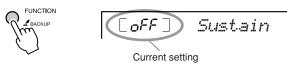

2 Select a desired Chorus Type by using the number buttons [0]-[9], [+], [-]. Refer to the Chorus Type list on page 75 for details. You can adjust the Chorus depth independently for the Main, Dual and Split Voices in the Function Settings (page 56).

Adding Panel Sustain

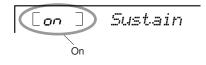

This function adds a fixed sustain to the keyboard Voices.

1 Press the [FUNCTION] button a number of times until the "Sustain" item appears.

2 Press the [+] button to turn the Panel Sustain on. Panel Sustain will be added to the notes you play on the keyboard when the Panel Sustain is on. To turn it off, press the [-] button.

 See the section "Connecting a footswitch (SUSTAIN Jack)" on page 9 for information on applying sustain with the optional footswitch.

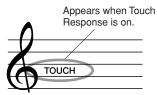

Handy Performance Features

Touch Response Sensitivity

Touch Response

 The Touch Response function cannot be used for some Voices (such as organ), even if the Touch Response icon appears in the display.

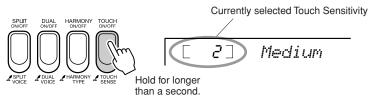

Press the [TOUCH ON/OFF] button to turn Touch Response on.

When Touch Response is on, you can control the volume of notes according to how hard you play the keys. Touch Response is normally on. Press the [TOUCH ON/OFF] button again to turn the Touch Response off. When Touch Response is off, the same volume will be produced no matter how hard you play the keys.

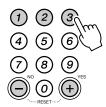

Setting the Touch Sensitivity

When Touch Response is on, you can adjust the sensitivity of the keyboard in response to keyboard dynamics in three steps. Higher values produce greater (easier) volume variation in response to keyboard dynamics—in other words, greater sensitivity.

Press and hold the [TOUCH ON/OFF] button for longer than a second. "TouchSns" appears in the display for a few seconds, followed by the current Touch Sensitivity value.

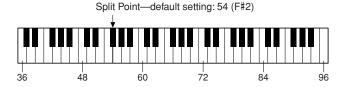

2 Select a Touch Sensitivity setting between 1 and 3 by using the number buttons [0]-[9], [+], [-].

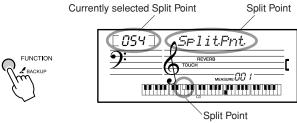

Setting the Split Point

The Split Point setting can be changed as desired.

The initial default Split Point is key number 54 (the F#2 key), but you can change it to another key. When you change the Split Point, the auto accompaniment range also changes.

1 Press the [FUNCTION] button a number of times until "SplitPnt" appears.

2 Set the Split Point by using the number buttons [0]-[9], [+], [-].

 Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (54 or F#2).

Transpose

The overall pitch of the instrument can be shifted up or down by a maximum of 1 octave in semitone increments.

1 Press the [FUNCTION] button a number of times until the "Transpos" appears.

2 Use the number buttons [0]-[9], [+], [-] to set the Transpose value between -12 and +12 as required.

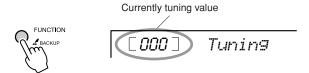

- The pitch of the Drum Kits Voices (Voice numbers 109-121) cannot be changed.
- Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (00).

Tuning

You can fine tune the pitch of the entire instrument. The overall tuning of the instrument can be shifted up or down by a maximum of 100 cents in 1-cent increments (100 cents = 1 semitone).

1 Press the [FUNCTION] button a number of times until "Tuning" appears.

2 Use the number buttons [0]-[9], [+] and [-] to set the Tuning value between -100 and +100 as required.

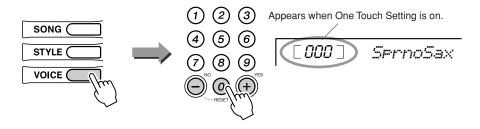

- The pitch of the Drum Kits Voices (Voice numbers 109-121) cannot be changed.
- Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (000).

One Touch Setting

Sometimes selecting the ideal Voice to play with a Song or Style can be confusing. The One Touch Setting feature automatically selects the most suitable Voice for you when you select a Style or Song. Simply select Voice number "000" to activate this feature.

Press the [VOICE] button, and then select Voice number "000" by using the number buttons [0]-[9], [+], [-].

This turns the One Touch Setting feature on. One Touch Setting will be turned off if you select any other Voice number.

Changing the tempo of the Song/Style

Songs and Styles can be played at any tempo you desire—fast or slow.

1 Press the [TEMPO/TAP] button to call up the Tempo setting in the display after selecting a Style/Song.

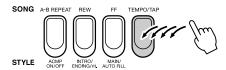

2 Set the Tempo by using the number buttons [0]-[9], [+], [-].

You can also set the Tempo by simply tapping the [TEMPO/TAP] button at the required tempo—four times for time signatures in 4, and three times for time signatures in 3.

You can change the Tempo during Style/Song playback by pressing the [TEMPO/TAP] button just twice.

 Press the [+] and [-] buttons simultaneously to instantly reset the value to the default tempo of a Style or Sona.

Adjusting the Voice Parameters

The volume, octave (the pitch of the instrument can be shifted by up or down in octaves) and Chorus Send Level can be individually adjusted for the Main, Dual, and Split Voices.

- Main Voice Parameters (page 57)
 - Main Voice Volume
 - Main Voice Octave
 - Main Voice Chorus Send Level
- Dual Voice Parameters (page 57)
 - Dual Voice Volume
 - Dual Voice Octave
 - · Dual Voice Chorus Send Level
- Split Voice Parameters (page 57)
 - Split Voice Volume
 - Split Voice Octave
 - Split Voice Chorus Send Level

You can adjust each of the parameters above in the Function settings (page 56).

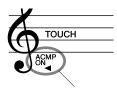

Style (Auto Accompaniment) Functions

Various ways to start and stop Style playback

Starting Style playback

The following three methods can be used to start Style playback. In all cases you will need to press the [ACMP ON/OFF] button to turn auto accompaniment on before actually starting Style playback. Whichever method you choose, you can press the [INTRO/ENDING/rit.] before starting playback. To begin your performance, an introduction will play automatically, then will automatically switch to the MAIN section when finished.

Appears when the auto accompaniment is on

■ Immediate Start

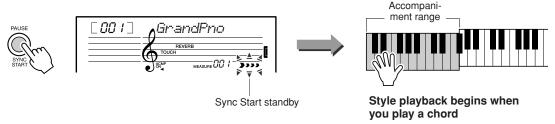

Press the [START/STOP] button to begin rhythm-only playback of the selected Style.

The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

■ Chord Start

Press the [SYNC START] button and the beat arrows will begin flashing, indicating that the Sync Start "standby" mode has been engaged. The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

■ Tap Start

You can supply a count-in at any tempo you like to start playback. Simply tap the [TEMPO/TAP] button at any tempo—4 times for time signatures in 4, and 3 times for time signatures in 3—and the selected Style rhythm will begin playing at the tapped tempo.

The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

Stopping Style playback

The following three methods can be used to stop Style playback.

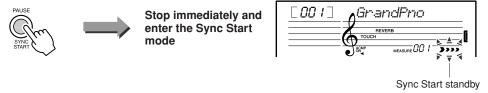

■ Immediate Stop

Playback will stop as soon as you press the [START/STOP] button.

■ Stop and Enter Sync Start Mode

If you press the [SYNC START] button during Style playback, playback will stop immediately and the Sync Start standby mode will be engaged (beat arrows will flash).

■ Play the Ending and Stop

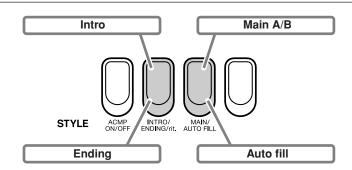

Press the [INTRO/ENDING/rit.] button to begin playing an ending section. Playback will stop when the ending has played all the way through.

If you press the [INTRO/ENDING/rit.] button a second time (while the ending is playing), the ending will play in ritardando (the tempo will gradually get slower).

Pattern Variation (Sections)

The instrument features a wide variety of Style "sections" (patterns) that allow you to vary the arrangement of the accompaniment to match the Song you are playing.

INTRO section

This is used for the beginning of the Song

When the intro finishes playing, accompaniment shifts to the main section.

The length of the intro (in measures) differs depending on the selected Style.

MAIN section

This is used for playing the main part of the Song. It plays a main accompaniment pattern, and repeats indefinitely until another section's button is pressed. There are two variations on the basic pattern (A and B), and the Style playback sound changes harmonically based on the chords you play with your left hand.

• Fill-in section

This is automatically added before changing the section A and B.

ENDING section

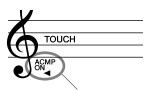

This is used for the ending of the Song. When the ending is finished, the auto accompaniment stops automatically. The length of the ending (in measures) differs depending on the selected Style.

1 Press the [STYLE] button and then select a Style.

2 Turn auto accompaniment on.

Press the [ACMP ON/OFF] button.

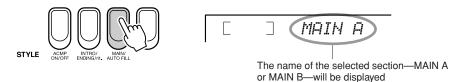

Appears when the auto accompaniment is on.

3 Turn SYNC START on.

Press the [SYNC START] button.

4 Press the [MAIN/AUTO FILL] button.

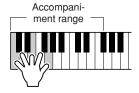

5 Press the [INTRO/ENDING/rit.] button.

6 As soon as you play a chord with your left hand, the Intro of the selected Style starts.

For this example, play a C major chord (as shown below). For information on how to enter chords, see "Playing Auto Accompaniment Chords" on page 52.

7 Press the [MAIN/AUTO FILL] button.

When the fill-in is finished, it leads smoothly into the selected main section A/B.

8 Press the [INTRO/ENDING/rit.] button.

This switches to the ending section.

When the ending is finished, the auto accompaniment stops automatically. You can have the ending gradually slow down (ritardando) by pressing the [INTRO/ENDING/rit.] button again while the ending is playing back.

Adjusting the Style Volume

This procedure allows you to adjust the balance between Style playback and the notes you play on the keyboard by setting the volume of the playback sound.

- **1** Press the [STYLE] button.
- 2 Press the [FUNCTION] button a number of times until the "StyleVol" appears.

3 Set the Style volume by using the number buttons [0]-[9], [+], [-].

 Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (100).

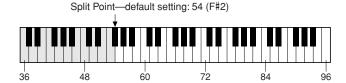

Playing Auto Accompaniment Chords

You've learned in the section "Play with a Style (Accompaniment)" on page 22 that the "feel" of the Style changes every time you play a chord on the left-hand side of the keyboard. Here, you'll learn the types of the chords and how to play them in greater detail. The examples of chords are given here in the key of C.

There are two basic ways (below) you can play the chords on the left-hand side of the keyboard, while playing the Style (page 23)

- **■** Easy Chords
- **■** Standard Chords

Easy Chords

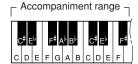

This method lets you easily play chords in the accompaniment range of the keyboard using only one, two, or three fingers.

 To play a major chord Press the root note of the chord.

• To play a seventh chord Press the root note together with the nearest white key to the left of it.

 Root notes and the corresponding keys

NOTE

• To play a minor chord Press the root note together with the nearest black key to the left of it

• To play a minor seventh chord Press the root note together with the nearest white and black keys to the left of it (three keys altogether).

Standard Chords

This method lets you produce accompaniment by playing chords using normal fingerings in the accompaniment range of the keyboard.

| c | C (9) | C ₆ | C ₆ (9) | CM ₇ | CM ₇ (9) | CM ₇ (#11) | C(♭5) | CM ₇ ♭5 |
|--------------------|----------------------|---------------------|---------------------|-------------------|---------------------|-----------------------|---------------------|----------------------|
| | | | | | | | | |
| Csus ₄ | Caug | CM ₇ aug | Cm | Cm ⁽⁹⁾ | Cm ₆ | Cm ₇ | Cm ₇ (9) | Cm ₇ (11) |
| CmM ₇ | CmM ₇ (9) | - | CmM ₇ ♭5 | Cdim | Cdim ₇ | C ₇ | C ₇ (♭9) | o |
| | | | | | | | | |
| C ₇ (9) | C ₇ (#11) | C ₇ (13) | C ₇ (#9) | • | C ₇ aug | • • <u>•</u> | • • <u>•</u> | |
| | | | | | | | | |

^{*} Notes enclosed in parentheses are optional; the chords will be recognized without them.

Recognized Standard Chords Chart

| Chord Name/[Abbreviation] | Normal Voicing | Chord (C) | Display |
|--|---|-----------|-----------|
| Major [M] | 1 - 3 - 5 | С | С |
| Add ninth [(9)] | 1 - 2 - 3 - 5 | C(9) | C(9) |
| Sixth [6] | 1 - (3) - 5 - 6 | C6 | C6 |
| Sixth ninth [6(9)] | 1 - 2 - 3 - (5) - 6 | C6(9) | C6(9) * |
| Major seventh [M7] | 1 - 3 - (5) - 7 or 1 - (3) - 5 - 7 | CM7 | CM7 |
| Major seventh ninth [M7(9)] | 1 - 2 - 3 - (5) - 7 | CM7(9) | CM7(9) * |
| Major seventh add sharp eleventh [M7(#11)] | 1 - (2) - 3 - #4 - 5 - 7 or 1 - 2 - 3 - #4 - (5) - 7 | CM7(#11) | CM7(#11)* |
| Flatted fifth [(\bdots5)] | 1 - 3 - ♭5 | C(♭5) | C♭5 * |
| Major seventh flatted fifth [M7♭5] | 1 - 3 - 15 - 7 | CM7♭5 | CM7♭5 * |
| Suspended fourth [sus4] | 1 - 4 - 5 | Csus4 | Csus4 |
| Augmented [aug] | 1 - 3 - #5 | Caug | Caug |
| Major seventh augmented [M7aug] | 1 - (3) - #5 - 7 | CM7aug | CM7aug * |
| Minor [m] | 1 - 1-3 - 5 | Cm | Cm |
| Minor add ninth [m(9)] | 1 - 2 - 13 - 5 | Cm(9) | Cm(9) |
| Minor sixth [m6] | 1 - 1-3 - 5 - 6 | Cm6 | Cm6 |
| Minor seventh [m7] | 1 - 1-3 - (5) - 17 | Cm7 | Cm7 |
| Minor seventh ninth [m7(9)] | 1 - 2 - 13 - (5) - 17 | Cm7(9) | Cm7(9) |
| Minor seventh add eleventh [m7(11)] | 1 - (2) - 3 - 4 - 5 - (7) | Cm7(11) | Cm7(11) * |
| Minor major seventh [mM7] | 1 - 1-3 - (5) - 7 | CmM7 | CmM7 |
| Minor major seventh ninth [mM7(9)] | 1 - 2 - 13 - (5) - 7 | CmM7(9) | CmM7(9) * |
| Minor seventh flatted fifth [m7♭5] | 1 - 63 - 65 - 67 | Cm7♭5 | Cm7♭5 |
| Minor major seventh flatted fifth [mM7♭5] | 1 - 1-3 - 15 - 7 | CmM7♭5 | CmM7♭5 * |
| Diminished [dim] | 1 - 1-3 - 1-5 | Cdim | Cdim |
| Diminished seventh [dim7] | 1 - 1-3 - 1-5 - 6 | Cdim7 | Cdim7 |
| Seventh [7] | 1 - 3 - (5) - ♭7 or 1 - (3) - 5 - ♭7 | C7 | C7 |
| Seventh flatted ninth [7(♭9)] | 1 - 12 - 3 - (5) - 17 | C7(b9) | C7(♭9) |
| Seventh add flatted thirteenth [7(\bar{1}3)] | 1 - 3 - 5 - 16 - 17 | C7(13) | C7(13) |
| Seventh ninth [7(9)] | 1 - 2 - 3 - (5) - 1-7 | C7(9) | C7(9) |
| Seventh add sharp eleventh [7(#11)] | 1 - (2) - 3 - #4 - 5 - ♭7 or 1 - 2 - 3 - #4 - (5) - ♭7 | C7(#11) | C7(#11) |
| Seventh add thirteenth [7(13)] | 1 - 3 - (5) - 6 - 1-7 | C7(13) | C7(13) |
| Seventh sharp ninth [7(#9)] | 1 - #2 - 3 - (5) - 1-7 | C7(#9) | C7(#9) |
| Seventh flatted fifth [7\b5] | 1 - 3 - 15 - 17 | C7♭5 | C7♭5 * |
| Seventh augmented [7aug] | 1 - 3 - #5 - ♭7 | C7aug | C7aug |
| Seventh suspended fourth [7sus4] | 1 - 4 - (5) - 1-7 | C7sus4 | C7sus4 |
| One plus two plus five [1+2+5] | 1 - 2 - 5 | C1+2+5 | C * |

- Notes in parentheses can be omitted.
- Playing two same root keys in the adjacent octaves produces accompaniment based only on the root.
- A perfect fifth (1+5) produces accompaniment based only on the root and fifth which can be used with both major and minor chords.
- The chord fingerings listed are all in "root" position, but other inversions can be used—with the following exceptions: m7, m7♭5, 6, m6, sus4, aug, dim7, 7♭5, 6(9), 1+2+5

 The chord fingerings listed are all in "root".
- Inversion of the 7sus4 and m7(11) chords are not recognized if the notes shown in parentheses are omitted.
- The auto accompaniment will sometimes not change when related chords are played in sequence (e.g. some minor chords followed by the minor seventh).
- Two-note fingerings will produce a chord based on the previously played chord.

^{*} These chords are not shown in the Chord Dictionary function.

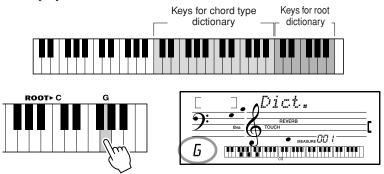

Looking up Chords Using the Chord Dictionary

The Dictionary function is essentially a built-in "chord dictionary" that shows you the individual notes of chords. It is ideal when you know the name of a certain chord and want to quickly learn how to play it.

Press and hold the [WAITING] button for longer than a second. "Dict." will appear in the display.

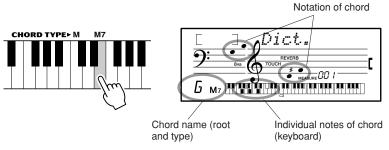

2 As an example, we'll learn how to play a GM7 (G major seventh) chord. Press the "G" key in the section of the keyboard labeled "ROOT." (The note doesn't sound.) The root note you set is shown in the display.

3 Press the "M7" (major seventh) key in the section of the keyboard labeled "CHORD TYPE." (The note doesn't sound.)

The notes you should play for the specified chord (root note and chord type) are shown in the display, both as notation and in the keyboard diagram.

To call up possible inversions of the chord, press the [+]/[-] buttons.

4 Try playing a chord in the auto accompaniment section of the key-board, checking the indications in the display.
When you've played the chord properly, a bell sound signals your success and the chord name in the display flashes.

 Major chords are usually indicated by the root name only. For example, the indication "C" in a score refers to a "C Major" chord. To look up the fingering for a major chord press the root key and then the M chord type key.

About chords

Playing two or more notes together simultaneously creates a "chord."

Playing a note together with two other notes spaced three notes (steps) apart—such as the notes C, E and G—creates a harmonious sound. Chords like these are called "triads" and they play an important role in most music.

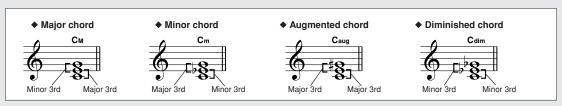

Taking the chord above as an example, the lowest note of this triad is called the "root note." This is the central note sound, and it supports or anchors the rest of the notes chord.

You'll notice that the middle note of the chord above (E) is the third step in the succession of scale notes—C, D, then E. There are two types of "thirds" in chords: major thirds and minor thirds.

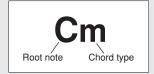

We'll also alter the top note of our original chord and make three additional chords, as shown below. (The captions indicate the intervals between each of the notes.)

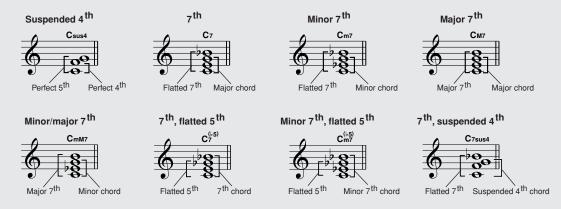

The basic characteristics of the chord sound are same, no matter if we change the order of the notes from bottom to top, or if we add other same name notes in different octaves. Beautiful sounding harmonies can be built in this manner, and emotional music can be created by playing different chords one after the other according to commonly accepted rules. Harmony determines the nature of chords, and music is created based on harmony.

Chord names

From the chord name, you can tell at a glance what type of chord it is and which notes make up the chord. Understanding the basic structure of chords is very useful—once you're familiar with this, you'll be quickly and easily play chords by looking at the names that appear above the notation.

Chord types (These chords are among those that can be recognized by the Fingered method.)

Function Settings

The [FUNCTION] button gives you access to a variety of operations related to adjusting or enhancing the sound and making settings for connection to external devices.

Select the item and change the value

There are 32 different items that can be set.

1 Press the [FUNCTION] button a number of times until desired item appears.

Each time the [FUNCTION] button is pressed 32 function items are displayed in sequence. The description and display sample is provided on the Function Setting List on page 56-57.

2 Set the value by using the number buttons [0]-[9], [+], [-].

For on/off settings or the PC Mode setting, use [+]/[-] buttons.

| 1 2 | 3 |
|------------|---------|
| 4 5 | 6/ |
| 78 | (a) |
| \bigcirc | (+) YES |

3 If necessary, hold the [FUNCTION] button for longer than a second to save your settings to flash memory.

(Refer to "Backup" on page 29)

Function Setting List

| Item | Display | Range/settings | Description |
|--------------|----------|---------------------|--|
| Style Volume | StyleVol | 000-127 | Determines the volume of the Style. |
| Song Volume | Son9Vol | 000-127 | Determines the volume of the Song. |
| Transpose | TransPos | -12-00-12 | Determines the pitch of the instrument by semitone increments. |
| Tuning | Tuning | -100-000-100 | Sets the pitch of the instrument's sound in 1-cent increments. |
| Split Point | SplitPnt | 000-127 (C-2-G8) | Determines the highest key for the Split Voice and sets the Split "point"—in other words, the key that separates the Split (lower) and Main (upper) Voices. The Split Point setting and Accompaniment Split Point setting are automatically set to the same value. |

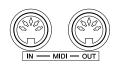

| Item | Display | Range/settings | Description |
|----------------------------------|-----------|------------------------------------|---|
| Touch Sensitivity | TouchSns | 1 (Soft) 2 (Medium) 3 (Hard) | When Touch Response is on, this determines the sensitivity of the feature. |
| Main Voice Volume | M. Volume | 000-127 | Determines the volume of the Main Voice. |
| Main Voice Octave | M.Octave | -2-0-2 | Determines the octave range for the Main Voice. |
| Main Voice Chorus Send Level | M.Chorus | 000-127 | Determines how much of the Main Voice's signal is sent to the Chorus effect. |
| Dual Voice | D.Voice | 001-482 | Selects the Dual Voice. |
| Dual Voice Volume | D.Volume | 000-127 | Determines the volume of the Dual Voice. |
| Dual Voice Octave | D.Octave | -2-0-2 | Determines the octave range for the Dual Voice. |
| Dual Voice Chorus Send Level | D.Chorus | 000-127 | Determines how much of the Dual Voice's signal is sent to the Chorus effect. |
| Split Voice | S.Voice | 001-482 | Selects the Split Voice. |
| Split Voice Volume | S.Volume | 000-127 | Determines the volume of the Split Voice. |
| Split Voice Octave | S.Octave | -2-0-2 | Determines the octave range for the Split Voice. |
| Split Voice Chorus Send Level | S.Chorus | 000-127 | Determines how much of the Split Voice's signal is sent to the Chorus effect. |
| Reverb Type | Reverb | 01-10 | Determines the Reverb type, including off (10). Refer to the Reverb Type list on page 75. |
| Reverb Level | RevLevel | 000-127 | Determines how much of the Voice's signal is sent to the Reverb effect. |
| Chorus Type | Chorus | 1-5 | Determines the Chorus Type, including off (05). Refer to the Chorus Type list on page 75. |
| Panel Sustain | Sustain | ON/OFF | Determines whether or not Panel Sustain is always applied to the Main/Dual/Split Voices. Panel Sustain is applied continuously when ON, or not applied when OFF. |
| Harmony Type | HarmType | 01-26 | Determines the Harmony Type. Refer to the Harmony Type list on page 75. |
| Harmony Volume | HarmVol | 000-127 | Determines the volume of the Harmony effect when Harmony type 1-5 is selected. |
| PC Mode | PC mode | OFF/PC1/PC2 | Optimizes the MIDI settings when you connect to a computer (page 60). |
| Local On/Off | Local | ON/OFF | Determines whether the instrument's keyboard controls the internal tone generator (ON) or not (OFF). |
| External Clock | ExtClock | ON/OFF | Determines whether the instrument synchronizes to the internal clock (OFF) or an external clock (ON). |
| Initial Setup Send | InitSend | YES/NO | Lets you send the data of the panel settings to a computer. Use the [+] button to transmit the data. |
| Time Signature | TimeSig | 00-15 | Determines the time signature of the Metronome. |
| Metronome Volume | MetroVol | 000-127 | Determines the volume of the Metronome. |
| Lesson Track (R) | R-Part | 01-16 | Determines the guide track number for your right hand lesson. The setting is only effective for Songs in SMF format 0 transferred from a computer. Refer to the section "Using Transferred Songs for Lessons" on page 63. |
| Lesson Track (L) | L-Part | 01-16 | Determines the guide track number for your left hand lesson. The setting is only effective for Songs in SMF format 0 transferred from a computer. Refer to the section "Using Transferred Songs for Lessons" on page 63 |
| Demo Cancel | D-Cancel | ON/OFF | Determines whether Demo cancel is enabled or not. When this is set to ON, the Demo Song will not play, even if the [DEMO] button is pressed. |

About MIDI

The instrument features a MIDI terminals that can be connected to other MIDI instruments and devices for expanded musical functionality.

What is MIDI?

MIDI (Musical Instrument Digital Interface) is a world-standard interface for communication between electronic musical instruments and music devices. When MIDI-equipped instruments are connected via a MIDI cable, it becomes possible to transfer performance and setting data between them for significantly enhanced performance and production potential.

⚠ CAUTION

 Connect the PSR-E303/YPT-300 to external equipment only after turning off power for all devices. Then, turn on the power, first to the PSR-E303/YPT-300, then to the connected external equipment.

What You Can Do With MIDI

- Transferring performance and setting data between the PSR-E303/YPT-300 and MIDI-equipped instruments or computers. (page 59)
- Transferring the data between the PSR-E303/YPT-300 and computers. (page 61)

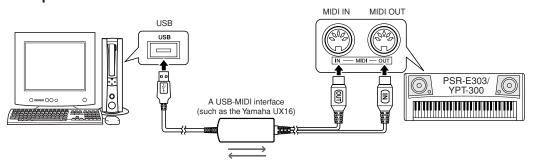

Transferring Performance Data To and From Another Instrument

By connecting the PSR-E303/YPT-300 to other MIDI devices or a computer, the performance data of the instrument can be used on those other MIDI devices or computer, and also the performance data from other MIDI devices and computer can be received and sounded with the PSR-E303/YPT-300.

• When the instrument is connected with another MIDI device, it transmits/receives performance data.

• When the instrument is connected with a computer, it transmits/ receives performance data.

■ MIDI settings

These settings should be made when transmitting/receiving performance data to a connected MIDI device or computer.

Local Settings

Local Control determines whether or not notes played on the instrument are sounded by its internal tone generator system; the internal tone generator is active when local control is on, and inactive when local control is off.

- On This is the normal setting in which notes played on the instrument's keyboard are sounded by the internal tone generator system. Data received via the instrument's MIDI terminal will also be played by the internal tone generator.
- Off With this setting the instrument itself produces no sound (keyboard performance, Harmony, or Style playback), but the performance data is transmitted via the MIDI terminal. Data received via the instrument's MIDI terminal will also be played by the internal tone generator.

You can set the Local Control in the Function Settings (page 56).

 If you can't get any sound out of the instrument, Local Control may be the most likely cause. Playing the keyboard results in no sound when Local is set to OFF.

External Clock Settings

These settings determine whether the instrument is synchronized to its own internal clock (OFF), or to a clock signal from an external device (ON).

On....... The instrument's time based functions will be synchronized to the clock from an external device connected to the MIDI terminal.

Off...... The instrument uses its own internal clock (default).

You can set the External Clock in the Function Settings (page 56).

 If External Clock is ON and no clock signal is being received from an external device, the Song, Style, and metronome functions will not start.

PC Mode

The PC settings instantly reconfigure all important MIDI settings (as shown below). The selections are PC1, PC2 and OFF.

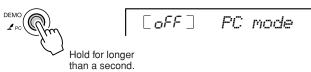

The chart of PC Settings

| | PC1 | PC2* | OFF |
|------------------|-----|------|-----|
| LOCAL | Off | Off | On |
| EXTERNAL CLOCK | On | Off | Off |
| SONG OUT** | Off | Off | On |
| STYLE OUT*** | Off | Off | On |
| KEYBOARD OUT**** | Off | On | On |

* Set the PC mode to PC2 when using Digital Music Notebook. Digital Music Notebook is a major new multimedia platform for music tuition and performance. Visit the website below for more information on the latest version of Digital Music Notebook and how to install it.

www.digitalmusicnotebook.com

- ** Determines whether Song data is transmitted (ON) via MIDI or not (OFF) during Song playback.
- *** Determines whether Style data is transmitted (ON) via MIDI or not (OFF) during Style playback.
- **** Determines whether keyboard performance data of the instrument is transmitted (ON) or not (OFF).
- **1** Press and hold the [DEMO] button for longer than a second to call up the PC Mode.

2 Select PC1, PC2, or OFF by using the [+], [-] buttons.

- Song Out, Style Out and Keyboard Out can only be changed by the PC setting. They cannot be set independently.
- Copyrighted Songs and User Songs cannot be used with Song Out.

Remote Control of MIDI Devices

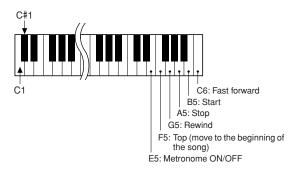

You can also use this instrument as a remote control device for the Digital Music Notebook application on your computer (via the MIDI connection) —controlling playback, stop and transport functions from the panel.

Remote control keys

PSR-E303/YPT-300: To use the remote control functions, simultaneously hold down the lowest two keys on the keyboard (C1 and C#1) and press the appropriate key (shown below).

 Remote control of MIDI devices will function independently of the PC2 mode.

PSR-E303/YPT-300 Panel Setting Transmission (Initial Send)

Sends the PSR-E303/YPT-300 panel settings to an external MIDI device. When recording a PSR-E303/YPT-300 performance to an external sequencer or similar equipment, you can use this function to send the current PSR-E303/YPT-300 panel settings so that when the sequence is played back the original panel settings are automatically restored. You can set Initial Send in the Function settings (page 56).

Transferring data between the PSR-E303/YPT-300 and a computer

The PSR-E303/YPT-300 includes 102 preset Songs, but you can load other Songs from your computer and use them in the same way as the preset Songs as long as the loaded Song is SMF format 0*.

Loaded Song data will be stored in Song numbers beginning with 108. In order to perform the operations described in this section you will need to use a computer connected to the Internet to download the free Musicsoft Downloader application from the URL listed below.

* The SMF (Standard MIDI File) format is one of the most common and widely compatible sequence formats used for storing sequence data. Most commercially available MIDI sequence data is provided in SMF Format 0.

Installing Musicsoft Downloader

You can download the "Musicsoft Downloader" application from the following website. Make sure that your computer has an Internet connection.

http://music.yamaha.com/download/

The minimum computer requirements for Musicsoft Downloader operation are as follows:

• OS : Windows 98SE/Me/2000/XP Home Edition/

XP Professional

• CPU : 233 MHz or higher; Intel® Pentium®/Celeron®

processor family (500 MHz or more is recommended)

• Memory : 64 MB or more (256 MB or more is recommended)

• Hard Disk: at least 128 MB of free space (at least 512 MB of free

space is recommended)

• Display : 800 x 600 HighColor (16-bit)

• Other : Microsoft® Internet Explorer®5.5 or higher

NOTE

 Visit the Yamaha website for more information on the latest version of Musicsoft Downloader (version 5.2.0 or higher) and how to install it

Connecting a personal computer

After installing the Musicsoft Downloader application on your computer, connect the PSR-E303/YPT-300 as described below.

A Yamaha UX16 or similar USB-MIDI interface (sold separately) will be necessary for MIDI connection between the PSR-E303/YPT-300 and a USB-equipped computer.

Make sure to purchase a Yamaha UX16 or a quality USB-MIDI interface at a musical instrument store, computer store or electrical appliance store. If you use the UX16 interface, install the driver supplied with the interface on your computer.

Transferring data from a computer

You can transmit Song files from your computer to your PSR-E303/YPT-300's Flash Memory.

For details about how to transmit Song data using the Music-soft Downloader application, refer to the Online help topic "Transferring Data Between the Computer and Instrument (for unprotected data)" of the Musicsoft Downloader.

Data that can be loaded to the PSR-E303/YPT-300 from a computer

• Songs : 99 Songs max (Song numbers 108-)

Data : 373 kilobytesData Format : SMF Format 0

• File : 05PK.USR (user file)

***.MID (MIDI Song)

- The Musicsoft Downloader application may not be able to access the instrument in the following cases:
 - · During Style playback
 - · During Song playback

⚠ CAUTION

- Use the power adaptor when transferring data. The data can be corrupted if the batteries fail during the transfer.
- Never turn the power off and never plug/ unplug the AC power adaptor during data transmission. Not only will the data fail to be transferred and saved, but operation of the flash memory may become unstable and its contents may disappear completely when the power is turned on or off.

 Close the window to exit from the Musicsoft Downloader and re-enable control of the instrument

Transferring a user file from the PSR-E303/YPT-300 to a computer

You can transfer backup data (page 29), including the five User Songs stored to the instrument, to a computer as a "user file" by using Musicsoft Downloader. For details about how to transmit Song data using the Musicsoft Downloader application, refer to the Online help topic "Transferring Data Between the Computer and Instrument (for unprotected data)" in the application.

Data that can be transferred to a computer from the PSR-E303/YPT-300

- User file (05PK.USR: backup data containing five User Songs)
- Songs transferred from a computer

NOTE

- Preset Song data cannot be transmitted from the PSR-E303/YPT-300.
- Do not rename the user file on the computer. If you do so, it will not be recognized when transferred to the instrument.

⚠ CAUTION

 The backup data, including the five User Songs is transmitted/received as a single file. As a result, all backup data (including the five Songs) will be overwritten every time you transmit or receive. Keep this in mind when transferring data.

● Erasing Transferred Song Data from the PSR-E303/YPT-300 Memory

To erase all Songs transferred from the computer, use "flash clear" function on page 29.

To erase specific Songs transferred from the computer, use the Delete function on Musicsoft Downloader.

Using Transferred Songs for Lessons

In order to use Songs (only SMF format 0) transferred from a computer for lessons it is necessary to specify which channels are to be played back as the right-hand and left-hand parts. Refer to the "Lesson Track (R)" or "Lesson Track (L)" in the Function Setting List on page 57. The procedure for setting the "guide track" is as follows: Select a transferred Song you want to use for lessons. Press the [FUNCTION] button a number of times until the "R-Part" or "L-Part" appears in the display, and then use the number buttons [0]-[9], [+], [-] to select the channel you want to play back as the specified right- or left-hand part.

We recommend that you select channel 1 for the right-hand part and channel 2 for the left-hand part.

Troubleshooting

| Problem | Possible Cause and Solution |
|---|--|
| When the instrument is turned on or off, a popping sound is temporarily produced. | This is normal and indicates that the instrument is receiving electrical power. |
| When using a mobile phone, noise is produced. | Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or use it further away from the instrument. |
| There is no sound even when the keyboard is played or when a Song or Style is being played back. | Check that nothing is connected to the PHONES/OUTPUT jack on the rear panel. When a set of headphones is plugged into this jack, no sound is output. |
| played back. | Check the Local Control on/off. (See page 59.) |
| Playing keys in the right hand area of the keyboard does not produce any sound. | When using the Dictionary function (page 54), the keys in the right hand area are used only for entering the chord root and type. |
| The volume is too soft. The sound quality is poor. The rhythm stops unexpectedly or will not play. The recorded data of the Song, etc. does not play correctly. The LCD display suddenly goes dark, and all panel settings are reset. | The batteries are low or dead. Replace all six batteries with completely new ones, or use the optional AC adaptor. |
| The Style or Song does not play back when the [START/STOP] button is pressed. | Is External Clock set to ON? Make sure External Clock is set to OFF; refer to "External Clock Settings" on page 60. |
| | Make sure that the Style Volume (page 51) is set to an appropriate level. |
| The Style does not sound properly. | Is the Split Point set at an appropriate key for the cords you are playing? Set the Split Point at an appropriate key (page 44). Is the "ACMP ON" indicator showing in the display? If it is not showing press the [ACMP ON/OFF] button so that it does show. |
| No rhythm accompaniment plays when the [START/STOP] button is pressed after selecting Style number 098-106 (Pianist). | This is not a malfunction. Style number 098-106 (Pianist) have no rhythm parts, so no rhythm will play. The other parts will begin playing when you play a chord in the accompaniment range of the keyboard if auto accompaniment is turned on. |
| Not all of the voices seem to sound, or the sound seems to be cut off. | The instrument is polyphonic up to a maximum of 32 notes. If the Dual voice or Split voice is being used and a style or Song is playing back at the same time, some notes/sounds may be omitted (or "stolen") from the accompaniment or Song. |
| The footswitch (for sustain) seems to produce the opposite effect. For example, pressing the footswitch cuts off the sound and releasing it sustains the sounds. | The polarity of the footswitch is reversed. Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power. |
| The sound of the voice changes from note to note. | This is normal. The AWM tone generation method uses multiple recordings (samples) of an instrument across the range of the keyboard; thus, the actual sound of the voice may be slightly different from note to note. |
| The ACMP ON indicator does not appear when the [ACMP ON/OFF] button is pressed. | Always press the [STYLE] button first when you are going to use any style-related function. |
| The harmony doesn't sound. | The method of sounding the harmony effect (01-26) differs depending on the selected type. For Types 01-05, turn the Auto Accompaniment on and play it by pressing a chord in the auto accompaniment section of the keyboard, then play some keys in the right-hand side to get the harmony effect. For Types 06-26, turning the Auto Accompaniment on or off has no effect. However, it is necessary to play two notes simultaneously for Types 06-12. |
| The part indications, such as Right, Left and Both Hands, do not appear—even when pressing the [R] or [L] buttons for the Lesson. | Make sure that you are not pressing the [R] or [L] buttons while the Song is playing. If you press one of the part buttons while playing the Song and before starting the Lesson, these buttons serve to mute the corresponding Song tracks. Stop the Song first, then select the desired part and start the Lesson. |

Voice List

The instrument has 32-note maximum polyphony. This means that it can play a maximum of up to 32 notes at once, regardless of what functions are used. Auto accompaniment uses a number of the available notes, so when auto accompaniment is used the total number of available notes for playing on the keyboard is correspondingly reduced. The same applies to the Split Voice and Song functions. If the maximum polyphony is exceeded, earlier played notes will be cut off and the most recent notes have priority (last note priority).

- The Voice List includes MIDI program change numbers for each voice. Use these program change numbers when playing the instrument via MIDI from an external device.
- Program Numbers 001 to 128 directly relate to MIDI Program Change Numbers 000 to 127. That is, Program Numbers and Program Change Numbers differ by a value of 1.
 Remember to take this into consideration.
- Some voices may sound continuously or have a long decay after the notes have been released while the sustain pedal (footswitch) is held

The voice number with an asterisk (*) is XGlite optional voice.

Drum Kit List

- " indicates that the drum sound is the same as "Standard Kit 1".
- Each percussion voice uses one note.
 The MIDI Note # and Note are actually one octave lower than keyboard Note # and Note. For example, in "109: Standard Kit 1", the "Seq Click H" (Note# 36/Note C1) corresponds to (Note# 24/Note C0).
 Key Off: Keys marked "O" stop sounding the instant they are released.
 Voices with the same Alternate Note Number (*1 ... 4) cannot be played simultaneously. (They are designed the besided alternate have the same Alternate Note Number (*1 ... 4) cannot be played simultaneously.
- to be played alternately with each other.)

Effect Type List

Harmony Types

| No. | Harmony Type | | Description | | | | |
|-----|--|-------------|--|--|--|--|--|
| 01 | Duet | If you wan | t to sound one of the harmony types 01-05, play keys to the right side of the Split | | | | |
| 02 | Trio | Point while | e playing chords in the left side of the keyboard after turning Auto Accompani- | | | | |
| 03 | Block | | One, two or three notes of harmony are automatically added to the note you on playing back a Song that includes chord data, harmony is applied whichever | | | | |
| 04 | Country play. When playing back keys are played. | | | | | | |
| 05 | Octave | neys are p | пауви. | | | | |
| 06 | Trill 1/4 note | J | | | | | |
| 07 | Trill 1/6 note | | | | | | |
| 08 | Trill 1/8 note |) | | | | | |
| 09 | Trill 1/12 note | 7 | If you keep holding down two different notes, the notes alternate (in a trill) continuously. | | | | |
| 10 | Trill 1/16 note | A | and day. | | | | |
| 11 | Trill 1/24 note | 3 | | | | | |
| 12 | Trill 1/32 note | , A | | | | | |
| 13 | Tremolo 1/4 note | | | | | | |
| 14 | Tremolo 1/6 note | 3 7 | | | | | |
| 15 | Tremolo 1/8 note |) | | | | | |
| | Tremolo 1/12 note | 3 | If you keep holding down a single note, the note is repeated continuously. (The repeat speed differs depending on the selected type.) | | | | |
| 17 | Tremolo 1/16 note | A | | | | | |
| 18 | Tremolo 1/24 note | 3 | | | | | |
| 19 | Tremolo 1/32 note | | | | | | |
| 20 | Echo 1/4 note | | | | | | |
| 21 | Echo 1/6 note | 3 | | | | | |
| 22 | Echo 1/8 note |) | | | | | |
| 23 | Echo 1/12 note | 3 | If you keep holding down a note, echo is applied to the note played. (The echo speed differs depending on the selected type.) | | | | |
| 24 | Echo 1/16 note | A | | | | | |
| 25 | Echo 1/24 note | 3 | | | | | |
| 26 | Echo 1/32 note | | | | | | |

Reverb Types

| No. | Reverb Type | Description |
|-------|-------------|-------------------------------|
| 01-03 | Hall 1-3 | Concert hall reverb. |
| 04-05 | Room 1-2 | Small room reverb. |
| 06-07 | Stage 1-2 | Reverb for solo instruments. |
| 08-09 | Plate 1-2 | Simulated steel plate reverb. |
| 10 | Off | No effect. |

Chorus Types

| No. | Chorus Type | Description |
|-----|-------------|--|
| 1-2 | Chorus 1-2 | Conventional chorus program with rich, warm chorusing. |
| 3-4 | Flanger 1-2 | This produces a rich, animated wavering effect in the sound. |
| 5 | Off | No effect. |

MIDI Data Format

NOTE:

- 1 By default (factory settings) the instrument ordinarily functions as a 16-channel multi-timbral tone generator, and incoming data does not affect the panel voices or panel settings. However, the MIDI messages listed below do affect the panel voices, auto accompaniment, and songs.
 - MIDI Master Tuning
 - System exclusive messages for changing the Reverb Type and Chorus Type.
- 2 Messages for these control change numbers cannot be transmitted from the instrument itself. However, they may be transmitted when playing the accompaniment, song or using the Harmony effect.
- 3 Exclusive
 - <GM System ON> F0H, 7EH, 7FH, 09H, 01H, F7H
 - This message automatically restores all default settings for the instrument, with the exception of MIDI Master Tuning.
 - <MIDI Master Volume> F0H, 7FH, 7FH, 04H, 01H, II, mm, F7H
 - This message allows the volume of all channels to be changed simultaneously (Universal System Exclusive).
 - The values of "mm" is used for MIDI Master Volume. (Values for "II" are ignored.)

- <MIDI Master Tuning> F0H, 43H, 1nH, 27H, 30H, 00H, 00H, mm, II, cc, F7H
 - This message simultaneously changes the tuning value of all channels.
 - The values of "mm" and "ll" are used for MIDI Master Tuning.
- The default value of "mm" and "ll" are 08H and 00H, respectively. Any values can be used for "n" and "cc."
- <Reverb Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, IIH, F7H
- mm : Reverb Type MSB
- II : Reverb Type LSB

Refer to the Effect Map (page 78) for details.

- <Chorus Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 20H, mmH, IIH, F7H
 - mm : Chorus Type MSB
 - II : Chorus Type LSB

Refer to the Éffect Map (page 78) for details.

- 4 When the accompaniment is started, an FAH message is transmitted. When accompaniment is stopped, an FCH message is transmitted. When the clock is set to External, both FAH (accompaniment start) and FCH (accompaniment stop) are recognized.
- 5 Local ON/OFF <Local ON> Bn, 7A, 7F <Local OFF> Bn, 7A, 00 Value for "n" is ignored.

■ Effect map • • • •

- * When a Type LSB value is received that corresponds to no effect type, a value corresponding to the effect type (coming the closest to the specified value) is automatically set.
- * The numbers in parentheses in front of the Effect Type names correspond to the number indicated in the display.

Limited Warranty

90 DAYS LABOR 1 YEAR PARTS

Yamaha Corporation of America, hereafter referred to as Yamaha, warrants to the original consumer of a product included in the categories listed below, that the product will be free of defects in materials and/or workmanship for the periods indicated. This warranty is applicable to all models included in the following series of products:

PSR, YPT SERIES OF PORTATONE ELECTRONIC KEYBOARDS

If during the first 90 days that immediately follows the purchase date, your new Yamaha product covered by this warranty is found to have a defect in material and/or workmanship, Yamaha and/or its authorized representative will repair such defect without charge for parts or labor.

If parts should be required after this 90 day period but within the one year period that immediately follows the purchase date, Yamaha will, subject to the terms of this warranty, supply these parts without charge. However, charges for labor, and/or any miscellaneous expenses incurred are the consumers responsibility. Yamaha reserves the right to utilize reconditioned parts in repairing these products and/or to use reconditioned units as warranty replacements.

THIS WARRANTY IS THE ONLY EXPRESS WARRANTY WHICH YAMAHA MAKES IN CONNECTION WITH THESE PRODUCTS. ANY IMPLIED WARRANTY APPLICABLE TO THE PRODUCT, INCLUDING THE WARRANTY OF MERCHANT ABILITY IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY, YAMAHA EXCLUDES AND SHALL NOT BE LIABLE IN ANY EVENT FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow limitations that relate to implied warranties and/or the exclusion of incidental or consequential damages. Therefore, these limitations and exclusions may not apply to you.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

CONSUMERS RESPONSIBILITIES

If warranty service should be required, it is necessary that the consumer assume certain responsibilities:

- Contact the Customer Service Department of the retailer selling the product, or any retail outlet authorized by Yamaha to sell the product for assistance. You may also contact Yamaha directly at the address provided below.
- Deliver the unit to be serviced under warranty to: the retailer selling the product, an authorized service center, or to Yamaha with an explanation of the problem. Please be prepared to provide proof purchase date (sales receipt, credit card copy, etc.) when requesting service and/or parts under warranty.
- 3. Shipping and/or insurance costs are the consumers responsibility.* Units shipped for service should be packed securely.

*Repaired units will be returned PREPAID if warranty service is required within the first 90 days.

IMPORTANT: Do NOT ship anything to ANY location without prior authorization. A Return Authorization (RA) will be issued that has a tracking number assigned that will expedite the servicing of your unit and provide a tracking system if needed.

4. Your owners manual contains important safety and operating instructions. It is your responsibility to be aware of the contents of this manual and to follow all safety precautions.

EXCLUSIONS

This warranty does not apply to units whose trade name, trademark, and/or ID numbers have been altered, defaced, exchanged removed, or to failures and/or damages that may occur as a result of:

- 1. Neglect, abuse, abnormal strain, modification or exposure to extremes in temperature or humidity.
- 2. Improper repair or maintenance by any person who is not a service representative of a retail outlet authorized by Yamaha to sell the product, an authorized service center, or an authorized service representative of Yamaha.
- 3. This warranty is applicable only to units sold by retailers authorized by Yamaha to sell these products in the U.S.A., the District of Columbia, and Puerto Rico. This warranty is not applicable in other possessions or territories of the U.S.A. or in any other country.

Please record the model and serial number of the product you have purchased in the spaces provided below.
